SPECIALIZED DISCLOSURE REPORT

UNISYS CORPORATION

(Exact Name of Registrant as Specified in its Charter)

Delaware	1-8729	38-0387840
(State or Other Jurisdiction of Incorporation)	(Commission File Number)	(IRS Employer Identification No.)

801 Lakeview Drive, Suite 100
Blue Bell, Pennsylvania 19422

(Address of Principal Executive Offices) (Zip Code)

Gerald P. Kenney: (215) 986-4205

(Name and telephone number, including area code, of the person to contact
in connection with this report)

Check the appropriate box to indicate the rule pursuant to which this
form is being filed, and provide the period to which the information in
this form applies:

\x\ Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for
the reporting period from January 1 to December 31, 2015.

SECTION 1 - CONFLICT MINERALS DISCLOSURE

ITEM 1.01 CONFLICT MINERALS DISCLOSURE AND REPORT

This Form SD of Unisys Corporation (the "Company") is filed pursuant to
Rule 13p-1 under the Securities Exchange Act of 1934, as amended, for the
reporting period from January 1 through December 31, 2015.

A copy of the Company's Conflict Minerals Report is provided as Exhibit
1.01 to this Form SD and is also available at the Company's website at
www.unisys.com under "About Unisys" in "Social Responsibility - Conflict
Minerals".

ITEM 1.02 EXHIBIT

The Company's Conflict Minerals report is filed as Exhibit 1.01 to this
Form SD.

SECTION 2 - EXHIBITS

Exhibit 1.01 - Conflict Minerals Report as required by Items 1.01 and
1.02 of this Form.

SIGNATURE

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.

UNISYS CORPORATION

Date: May 31, 2016

Senior Vice President
General Counsel and
Secretary

UNISYS CORPORATION
 CONFLICT MINERALS REPORT
 REPORTING YEAR: 2015

COMPANY OVERVIEW

Unisys Corporation ("Unisys") is a global information technology ("IT") company. Unisys provides a portfolio of IT services, software, and technology. Unisys operates in two business segments -- Services and Technology. In its Technology segment, Unisys designs and develops servers, software and related products.

Unisys hardware products (as detailed in Exhibit A below) contain conflict minerals, as that term is referenced in Rule 13p-1 under the Securities Exchange Act. These conflict minerals are introduced into Unisys products through parts obtained from suppliers, either contract manufacturers or original equipment manufacturers ("OEM"), or from utilization of conflict minerals in manufacturing processes employed by Unisys suppliers. Supplier parts obtained by Unisys are utilized in the assembly of Unisys enterprise servers and other electronic equipment. Unisys is not a vertically integrated manufacturer and instead focuses on systems integration through the purchase of higher level assemblies and OEM products. Unisys is therefore several levels removed from the actual mining of conflict minerals. Unisys does not make purchases of raw ore or unrefined conflict minerals and makes no direct purchases in the Democratic Republic of the Congo or an adjoining country (collectively, the "DRC"). Unisys does actively support a conflict-free minerals trade policy with DRC covered countries from its suppliers. Unisys works with its suppliers to pursue elimination of smelters that have not achieved CFSI (as defined below) compliance, or are not recognized by CFSI as actively working toward compliance.

A copy of Unisys' Conflict Minerals Policy Statement, along with its latest Conflict Minerals Report may be found at the following Unisys website: <http://www.unisys.com/about-us/social-responsibility/conflict-minerals>. Unisys maintains an internal conflict minerals team, facilitated by a management representative of the Platform and Supply Chain organization, with team members representing Commodity Management, Logistics, Procurement Technical Services, and Process Engineering groups.

REASONABLE COUNTRY OF ORIGIN INQUIRY

Unisys conducted a reasonable country of origin inquiry ("RCOI") to determine which parts utilized by Unisys during 2015 contained conflict minerals and whether such conflict minerals originated in the DRC. Unisys contacted each of its suppliers and asked them to provide information on (1) the conflict minerals contained in each of the parts supplied by that supplier, and (2) the source of the conflict minerals, including smelter/refinery information and location of mines. Each supplier was asked to complete the Conflict Minerals Reporting Template (the "Reporting Template") developed by the Electronic Industry Citizenship Coalition Global e-Sustainability Initiative (the "EICC-GeSI"). Of the 31 suppliers identified as supplying Unisys with product that may contain conflict minerals in 2015, 26 suppliers (84% response rate) responded with a completed Reporting Template and detailed conflict minerals smelter data. From these templates Unisys identified a total of 306 operational smelter and refiner facilities which may have processed necessary conflict minerals contained in Unisys products. Further analysis of these 306 smelters is summarized in the Due Diligence -- Results section of this report. Based on these responses, Unisys determined that conflict minerals that are present in many of its products, as well as conflict minerals utilized in the production of certain supplier parts, may have originated in the DRC and were not from scrap or recycled sources. Therefore, in accordance with Rule 13p-1 under the Securities Exchange Act, Unisys proceeded to engage in due diligence regarding the sources and chain of custody of its conflict minerals.

Following is a listing of country of origin information, as collected during Unisys RCOI process

Conflict Mineral	RCOI Analysis	Reported Countries of Origin
Tin		Australia, Bolivia, Brazil, Canada, Chile, China, DRC, Indonesia, Malaysia, Mexico, Peru, Philippines, Poland, Rwanda, Thailand, USA

Tantalum	Australia, Belarus, Bolivia, Brazil, Burundi, Canada, China, DRC, Estonia, Ethiopia, Germany, India, Japan, Kazakhstan, Malaysia, Mozambique, Namibia, Niger, Nigeria, Russia, Rwanda, Sierra Leone, Thailand, USA, Zimbabwe
Tungsten	Australia, Austria, Bolivia, Brazil, Cambodia, Canada, China, Columbia, Indonesia, Mexico, Mongolia, Nigeria, Peru, Portugal, Russia, Rwanda, Spain, Thailand, USA, Vietnam
Gold	Argentina, Australia, Belgium, Brazil, Canada, China, Ghana, Guyana, Indonesia, Japan, Kazakhstan, Malaysia, Kenya, Laos, Malaysia, Mexico, Papua New Guinea, Peru, Philippines, Russia, South Africa, South Korea, Spain, Sudan, Suriname, Switzerland, Taiwan, Thailand, United Arab Emirates, USA

DUE DILIGENCE - STANDARD UTILIZED

Unisys designed its due diligence framework to conform in all material respects with the framework provided by The Organization for Economic Co-operation and Development Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas, an internationally-recognized due diligence framework.

DUE DILIGENCE - PROCESS

The Unisys due diligence process included:

1. Requesting that each supplier of parts potentially containing conflict minerals complete and return to Unisys the Reporting Template. The Reporting Template provided a standardized method for Unisys to use in the collection of representations, statements and data from Unisys suppliers relative to the presence, use, source and chain of custody of conflict minerals in supplier parts that are incorporated in Unisys products for sale to end-use customers.
2. Requesting that each supplier of parts potentially containing conflict minerals identify on the Reporting Template those smelters that it uses to process parts provided to Unisys by making reference to the EICC-GeSI's Smelter Reference List, which is a compilation of names and locations of known smelters and refiners, provided by Unisys.
3. Comparing the smelters identified in the responses by suppliers who completed the Reporting Template against the list of smelter facilities that have been identified as "conflict free" by the EICC-GeSI's Conflict-Free Sourcing Initiative ("CFSI"). CFSI is a voluntary program whereby an independent third party evaluates smelter procurement activities to determine whether a smelter has sufficiently demonstrated that all materials processed by that smelter originated from sources that do not directly or indirectly finance or benefit armed groups in the DRC.

Each supplier response on the Reporting Template was evaluated and, where possible, validated to determine sufficiency, accuracy or completeness of its response. For each supplier response, Unisys subsequently assessed whether the conflict minerals identified, or those conflict minerals that may not have been identified, were consistent with the nature and characteristics of the supplied part. For each supplier response that was insufficient, potentially inaccurate or incomplete, Unisys contacted that supplier for follow up, sometimes contacting certain suppliers on multiple occasions. When a supplier's response on the Reporting Template stated that conflict minerals were sourced from the DRC and identified the smelter involved, Unisys proceeded to verify whether the smelter referenced by the supplier was identified on the CFSI compliant smelter list. If a supplier stated that conflict minerals in its product were not sourced from the DRC, but did not substantiate that information, Unisys proceeded to verify that supplier response. Typically, verification involved a more detailed review of the supplier's smelter response and, where possible, discussion with the supplier. If a supplier's response could not be validated through details provided to Unisys with regard to the smelter and/or smelters involved, then Unisys engaged in its own internet searches in order to attempt to verify the status

of such identified smelters. If Unisys independent research could not determine the status of a smelter, then the supplier response in question was determined to be uncertain or unknown relative to the question of sourcing of raw material and was reflected as such in its Reporting Template Summary.

DUE DILIGENCE - RESULTS

As of April 1, 2016, of the 306 smelters identified in responses on the Reporting Template submitted to Unisys by its suppliers, 212 smelters were CFSI compliant, 31 smelters were actively in the process of obtaining CFSI compliance, and 63 smelters were identified as not participating in the CFSI smelter verification process.

Unisys RCOI and due diligence processes reveal that there is no evidence of conflict minerals sourcing from the DRC for 278 of the 306 smelters that may be associated with conflict minerals utilized in Unisys products or in third party manufacturing processes utilized to manufacture Unisys products. Of the remaining 28 smelters for which there is evidence that conflict minerals may have been sourced from the DRC, 22 of those smelters are CFSI compliant. Unisys RCOI and due diligence processes have identified 6 smelters that were not participating in the CFSI smelter verification process as of April 1, 2016 that may have sourced conflict minerals from the DRC that were used in Unisys products in 2015.

Although Unisys due diligence efforts determined that 300 of 306 smelters that may be associated with Unisys products during 2015 were either not sourcing conflict minerals from the DRC or were not supporting armed conflict in the DRC, Unisys was unable to precisely determine the status of the 6 remaining smelters.

RISK MITIGATION -- IMPROVEMENT PROGRAM

The steps that Unisys will take in reporting year 2016 to mitigate the risk that Unisys conflict minerals benefit or finance armed groups are as follows:

1. Unisys will work with those suppliers whose conflict minerals supporting documentation contained one or more of the 6 smelters whose sourcing was considered to be in question. The goal would be to eliminate the use of those smelters by said supplier/s or to validate their CFSI compliance.
2. Unisys will continue to work with suppliers who provided incomplete or insufficient information in an effort to obtain complete and accurate information in 2016;
3. Unisys will again request information and supporting data from each supplier providing parts to Unisys that are subject to 2016 reporting requirements by utilizing the Reporting Template and will pursue a completed template response that identifies material down to the smelter and mine;
4. Unisys will again follow its due diligence process to review and validate supplier responses that are obtained in support of Unisys 2016 conflict minerals reporting;
5. Unisys will continue to provide its Conflict Minerals Policy to suppliers as part of its Reporting Template-based supplier inquiry process for 2016; and
6. Unisys includes in its purchase order standard terms and conditions a clause requiring suppliers to disclose to Unisys the existence and origin of any conflict minerals in any products supplied to Unisys and is adding a similar clause to its agreement templates for incorporation into new agreements. Unisys agreements will continue to be reviewed as they approach renewal, and a similar clause will be added as appropriate.

PRODUCT DESCRIPTION AND LIST OF FACILITIES

A list of parts used in Unisys enterprise servers and other electronic equipment for which Unisys solicited supplier information regarding conflict mineral content or conflict mineral use in production is attached as Exhibit A. A list of smelter facilities that, to the extent known, processed the necessary conflict minerals in Unisys products is attached as Exhibit B.

CONFLICT MINERALS REPORT
EXHIBIT A

DESCRIPTION OF UNISYS CORPORATION'S 2015 PRODUCTS (PARTS/SUPPLIES)

PRODUCT DESCRIPTION - (CONFLICT MINERAL)
 Cables & Harnesses* - (tin, gold)
 Computer Cabinets & Accessories - (none)
 Computer Products - Servers, Storage, Input/Output & other Peripherals* -
 (tin, tantalum, tungsten, gold)
 Displays / Monitors* - (tin, tantalum, tungsten, gold)
 Fasteners - (none)
 Flex Circuits* - (tin, gold)
 Keyboards* - (tin, tantalum, tungsten, gold)
 Labels - (none)
 Memory - Modules* - (tin, tantalum, tungsten, gold)
 Molded Plastic Parts - (none)
 Network Switches* - (tin, tantalum, tungsten, gold)
 Power Strips* - (tin, tantalum, tungsten, gold)
 Power Supplies* - (tin, tantalum, gold)
 Printed Circuit Assemblies* - (tin, tantalum, tungsten, gold)
 Sheet Metal - (none)
 Electro-mechanical Assemblies* - (tin, tantalum, tungsten, gold)
 Solder* - (tin)
 Thermal Transfer Products - (none)

 Universal Serial Port (USB) Security Devices, Flash cards* - (tin, gold)

* Denotes Unisys Products known to contain conflict minerals - tin, tantalum, tungsten, or gold
