Claudius Sokenu: (215) 986-4011  
(Name and telephone number, including area code, of the person to contact in connection with this report.)

Check the appropriate box to indicate the rule pursuant to which this form is being filed, and provide the period to which the information in this form applies:

Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1 to December 31, 2022.

## **SECTION 1 - CONFLICT MINERALS DISCLOSURE**

### **ITEM 1.01 CONFLICT MINERALS DISCLOSURE AND REPORT**

This Form SD of Unisys Corporation (the "Company") is filed pursuant to Rule 13p-1 under the Securities Exchange Act of 1934, as amended, for the reporting period from January 1 through December 31, 2022.

A copy of the Company's Conflict Minerals Report is provided as Exhibit 1.01 to this Form SD and is also available at the Company's website, attached as an exhibit to the Company's most recent Form SD, at <https://www.unisys.com/investor-relations/financials-filings/sec-filings>.

### **ITEM 1.02 EXHIBIT**

The Company's Conflict Minerals report is filed as Exhibit 1.01 to this Form SD.

## **SECTION 2 - EXHIBITS**

[Exhibit 1.01](#) - Conflict Minerals Report as required by Items 1.01 and 1.02 of this Form.

**SIGNATURE**

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.

Date: May 26, 2023

UNISYS CORPORATION

Senior Vice President, General Counsel  
and Secretary

**Unisys Corporation**  
**Conflict Minerals Report**  
**Reporting Year: 2022**

**Introduction**

Unisys Corporation (“Unisys”) has prepared this Conflict Minerals Report in accordance with Rule 13p-1 of the Securities Exchange Act, as amended to reflect the requirements of the Dodd-Frank Wall Street and Consumer Protection Reform Act of 2010. The scope of this document covers the reporting period from January 1 through December 31, 2022.

“Conflict Materials” are defined by the U.S. Securities and Exchange Commission (the “SEC”) as gold, columbite-tantalite, cassiterite, wolframite, and their derivatives – tin, tantalum, and tungsten (collectively referred to as “3TGs”). Rule 13p-1 requires the annual disclosure of certain information when the 3TGs used in the manufacture of a company’s products are known (or are suspected) to originate from certain conflict regions – specifically from the countries of Angola, Burundi, Central African Republic, Democratic Republic of the Congo, Republic of the Congo, Rwanda, South Sudan, Tanzania, Uganda, and Zambia (collectively referred to as “DRC Covered Countries”).

**Company & Supply Chain Overview**

Unisys is a global information technology (“IT”) solutions company that provides a portfolio of IT services, software, and technology. Unisys operates in three reportable segments – Digital Workplace Services, Cloud and Infrastructure Solutions and Enterprise Computing Solutions. In its Enterprise Computing Solutions segment, Unisys develops software and designs systems using commodity servers and server related products.

Many Unisys hardware products require the use of one or more 3TG metals (as detailed in Exhibit A below). These Conflict Minerals are introduced into Unisys products through parts obtained from suppliers, either contract manufacturers or original equipment manufacturers (“OEM”), or from utilization of Conflict Minerals in manufacturing processes employed by Unisys suppliers. Supplier parts obtained by Unisys are utilized in the assembly of Unisys enterprise servers and other electronic equipment. Unisys is not a vertically integrated manufacturer and instead focuses on systems integration through the purchase of higher level assemblies and OEM products. Unisys is therefore several levels removed from the actual mining of Conflict Minerals. Unisys does not make purchases of raw ore or unrefined Conflict Minerals and makes no direct purchases from DRC Covered Countries. In addition, Unisys does not procure directly from smelters or refiners (“SORs”). Unisys does, however, actively support a conflict-free minerals trade policy with DRC Covered Countries from its suppliers. Unisys works with its suppliers to either pursue the development or elimination of SORs that have not achieved RMAP conformance (as defined herein), or are not recognized by RMI as actively working toward compliance.

A copy of Unisys’ Conflict Minerals Policy Statement may be found at the following Unisys website:  
<https://www.unisys.com/about-us/environmental-social-and-governance/conflict-minerals>. A copy of the latest Conflict Minerals Report, attached as an exhibit to Unisys’ most

recent Form SD, may be found at <https://www.unisys.com/investor-relations/financials-filings/sec-filings>.

### **Due Diligence Process Design**

Unisys designed its due diligence process to conform with the framework established for Downstream Supply Chains, as provided by The Organization for Economic Co-operation and Development (“OECD”) “Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas”. As a downstream company, Unisys does not have direct business relationships with SORs or visibility into the movement of Conflict Minerals between mine locations, SORs, or upstream companies. As such, Unisys relies to a large extent on information obtained from industry sources, as well as information obtained from its in-scope direct suppliers.

Unisys supports and leverages the efforts of the Responsible Business Alliance – Responsible Minerals Initiative (“RMI”), Responsible Minerals Assurance Process (“RMAP”), and Conflict Minerals Reporting Template (“CMRT”), as well as industry sponsored third party audits and independent audits performed by the London Bullion Market Association (“LBMA”) and the Responsible Jewellery Council Chain of Custody Standard (“RJC CoC”), in the analysis of SORs for in scope suppliers utilized by Unisys.

### **2022 Due Diligence Measures Performed**

Following is a summary of the 2022 due diligence measures performed by Unisys - per the 5 Step OECD Due Diligence Guidelines.

#### **Step 1: Establish Strong Company Management Systems**

- ***Maintain a Supply Chain Policy for Conflict Minerals Originating from Identified Conflict Regions***

A copy of Unisys’ Conflict Minerals Policy is posted at the Unisys Social Responsibility web site (see link above). Implementation of this policy is accomplished via Unisys’ internal ISO9001:2015 Quality Management system within procedures adopted by Unisys’ Global Procurement and Supply Chain Operations groups.

- ***Maintain an Internal Conflict Minerals Team***

Unisys maintains an internal Conflict Minerals team, facilitated by a management representative of the Supply Chain organization, and composed of team members representing Commodity Management, Supplier Quality Assurance, and Compliance and Supply Chain Engineering groups. The team is responsible for coordinating and implementing all aspects of the Unisys’ Conflict Minerals program, and for communicating results to Unisys senior management.

- ***Communicate Unisys Conflict Minerals Requirements to Suppliers***

Unisys includes in its purchase order standard terms and conditions a clause that states Unisys Conflict Minerals policy and that requires suppliers to disclose to Unisys the existence and origin of any Conflict Minerals in products supplied to Unisys. As an additional measure, Unisys has

added a similar clause to its agreement templates for incorporation into applicable new agreements. Unisys agreements continue to be reviewed as they approach renewal, and a similar clause is added as appropriate. Unisys also provides additional written notifications to all in scope suppliers reiterating the Unisys Conflict Minerals Policy and outlining the subject years reporting requirements. For suppliers that have not met previous required reporting obligations, Unisys communicates specifically on required reporting improvements, or alternatively, may choose to eliminate the supplier from the Unisys supply chain.

- ***Provide an On-Line Grievance Mechanism for Conflict Minerals Concerns***

Unisys' Social Responsibility web site contains a link that may be used by concerned parties to communicate Conflict Minerals information to Unisys and/or to report to Unisys corporate management any perceived Conflict Minerals issues.

- ***Retain Records Relating to Supplier Conflict Minerals Performance***

Unisys maintains records of relevant supplier correspondence relating to Unisys' Conflict Minerals program - including supplier provided CMRTs, relevant e-mails, and Unisys Supplier Assessments - per Unisys records retention policies.

## **Step 2: Identify and Assess Risk in the Supply Chain**

- ***Obtain Conflict Minerals Information from In-Scope Unisys Suppliers***

Unisys maintains direct contact with each of its in-scope suppliers and requires them to provide information on a minimum annual basis regarding (1) the specific Conflict Minerals contained in parts supplied to Unisys and (2) the potential source of the Conflict Minerals, including smelter/refinery information. Each supplier is required to submit a completed CMRT covering the most recent reporting period.

- ***Analyze Supplier CMRTs for Accuracy/Completeness, and Communicate Any Issues with Suppliers***

Each supplier CMRT is reviewed to determine the completeness and timeliness of its response. For each CMRT, Unisys assesses whether the 3TGs identified are consistent with the technology and complexity of the supplied part(s), and whether the supplier's responses demonstrate sufficient commitment to conflict-free sourcing principles. Follow-up is performed on supplier responses judged to be insufficient or questionable, and updated information obtained, as applicable. Any supplier deemed to be non-responsive after follow-up attempts is flagged as a problem supplier that requires either additional diligence, or creation of a plan to remove the subject supplier from the Unisys supply chain.

- ***Develop a Unisys CMRT***

A Unisys CMRT, comprised of a roll-up of all supplier provided CMRT data, is developed using a commercially available software package from a major Conflict Minerals service provider. The software package is further used to scrub and refine the smelter data so as to eliminate invalid, erroneous, or duplicate smelter entries, and to identify a final Unisys smelter list.

- ***Perform a Reasonable Country of Origin (RCOI) Analysis to Assess the Source of 3TGs***

A Reasonable Country of Origin Inquiry (“RCOI”) is performed on the Unisys smelter list to determine, to the extent possible, the mine locations from which each smelter’s ore originates, and whether any of these locations are within DRC Covered Countries. The source of this information is a combination of data obtained from supplier provided CMRTs, as well as data published at smelter web sites, RMI RMAP conformant / RMAP active smelter data, and to a lesser degree, data from third party sources. As a result of Unisys’ RCOI analysis, each SOR is tagged as to whether their 3TG sourcing “Excludes Covered Countries”, “Includes Covered Countries”, is “Unknown”, or is from “100% Scrap/Recycle” sources.

- ***Perform Further Due Diligence on SORs Sourcing from DRC Region***

SORs whose RCOI analysis either “Includes Covered Countries” or is “Unknown” are considered candidates for further Unisys due diligence measures. A significant distinction is made by Unisys between SORs who have successfully completed the RMI - RMAP or are actively pursuing RMAP conformance, versus SORs who have chosen not to participate in the program, with the former (RMAP) groups believed to represent a low risk of supporting armed conflict. Unisys due diligence efforts are therefore focused on those SORs who are not currently RMAP conformant or actively working to achieve RMAP conformance, and are therefore considered to be of higher risk.

Unisys due diligence efforts for higher risk smelters involve a thorough review of publicly available SOR information, with an emphasis on evidence of support for armed conflict or a history of questionable or unethical business behavior or human rights abuse.

### **Step 3: Respond to Identified Risks**

- ***Identify “At Risk” Smelters and Undertake Mitigation Actions***

SORs who are identified to be “at risk” for support of armed conflict or unethical business behavior are brought to the attention of the specific Unisys supplier whose CMRT reported that smelter, and a plan is requested for risk mitigation. The goal of this effort is to either validate the smelter’s intention to pursue RMAP conformance within a prescribed period of time, or alternatively, to eliminate the SOR from potential use in Unisys products.

- ***Report Conflict Minerals Status and Risks to Unisys Supply Chain Management***

Unisys due diligence efforts and risk mitigation plans are reviewed with the Director of Supply Chain Operations during the course of regularly scheduled compliance review meetings.

- ***Maintain Awareness of Potential Problematic SORs as Reported by Non-Governmental Organizations (“NGOs”) or Third Party Conflict Minerals Service Providers***

Unisys’ Conflict Minerals team works to maintain awareness of potentially problematic SORs, as reported by various NGOs or third party Conflict Minerals service providers, and strives to avoid use of these SORs in the Unisys supply chain.

#### **Step 4: Carry Out Independent Third Party Audit of Supply Chain Due Diligence**

As a downstream supply chain company, Unisys has no direct business relationship with SORs, and relies heavily on independent third party audits performed by RMI's RMAP, as well as similar third party gold audits performed by the LBMA and the RJC CoC, all of which employ the OECD Due Diligence Guidance process.

#### **Step 5: Report Annually on Supply Chain Due Diligence**

In accordance with Rule 13p-1 of the Securities Exchange Act, each year Unisys files with the SEC a Specialized Disclosure Form ("Form SD") together with an accompanying Conflict Minerals Report ("CMR"). A copy of Unisys' Conflict Minerals Policy Statement is published on the Unisys Environmental Social and Governance website (see link above).

#### **2022 Due Diligence Findings/Results**

For calendar year 2022, Unisys identified a total of 13 in-scope suppliers that provided purchased parts containing one or more Conflict Minerals that were used in the manufacture of Unisys products. Latest revision CMRTs were requested from each of these suppliers, from which Unisys received a total of 13 completed responses (i.e., 100% supplier response rate).

From the 13 CMRTs received, Unisys identified a total of 349 operational SORs that may have processed Conflict Minerals contained in Unisys products. Of the 349 SORs – 227 (65%) were RMAP conformant, 8 (2%) were actively pursuing RMAP conformance through participation in either RMI or LBMA Audit processes, while 114 SORs (33%) were identified as currently "Non-Participating" in an OECD Guidance based audit program.

Unisys remains committed to working with its suppliers to achieve continuous improvement in supply chain performance, especially as new products are introduced, and continues to strive to maximize the percentage of SORs actively participating in the RMI conflict-free program.

Unisys RCOI and due diligence investigations for the 114 SORs not currently participating in an OECD Guidance based audit program found no evidence of sourcing from DRC Covered Countries for 105 of the SORs. Out of the remaining nine, five were identified as higher risk due to prior reported incidences.

It is Unisys' policy to progress in eliminating high risk SORs that may have been used in parts supplied to Unisys. Since the last reporting year, the total number of identified high risk SORs decreased from seven to five; and the total number of Unisys suppliers reporting the use of these high risk SORs decreased from eight to three. Unisys is committed to continue working with the three suppliers to eliminate the high risk SORs from their supply chain for the product/s that Unisys procures from them.

Table 1 below lists the countries of origin based on information obtained through the CMRT data collection and RCOI processes. This list may include more countries than those that are actual sources of 3TG in Unisys products - CMRT submissions from several Unisys suppliers were at the company level, and not specific to the products they supply to Unisys.

Afghanistan	Democratic Republic of the Congo	South Korea	Senegal
Albania	Djibouti	Kyrgyzstan	Serbia
Andorra	Dominica	Laos	Sierra Leone
Angola	Dominican Republic	Liberia	Singapore
Argentina	Ecuador	Luxembourg	Slovakia
Armenia	Egypt	Madagascar	Slovenia
Australia	Eritrea	Malaysia	Solomon Islands
Austria	Estonia	Mali	South Africa
Azerbaijan	Ethiopia	Mauritania	South Sudan
Belarus	Fiji	Mexico	Spain
Belgium	Finland	Mongolia	Sudan
Benin	France	Morocco	Suriname
Bolivia	Georgia	Mozambique	Eswatini
Botswana	Germany	Myanmar	Sweden
Brazil	Ghana	Namibia	Switzerland

Congo	Israel	Poland	Uzbekistan
Costa Rica	Italy	Portugal	Venezuela
Cote d'Ivoire	Japan	Russian Federation	Vietnam
Cuba	Kazakhstan	Rwanda	Zambia
Cyprus	Kenya	Saudi Arabia	Zimbabwe

Table 1 – Potential Countries of Origin for Conflict Minerals used by SORs listed in Exhibit B.

### **Risk Mitigation – Improvement Program**

Following is a list of steps that Unisys has taken or is taking to mitigate the risk that Unisys Conflict Minerals might benefit or finance armed groups:

1. After review of the High Risk SORs identified during the 2022 due diligence process, it was determined that three Unisys suppliers potentially sourced 3TGs from one or more of the five high risk SORs. Unisys is currently working with these suppliers to better understand the actions being taken relative to the subject high risk SORs and their removal. In parallel, since many of Unisys suppliers report at a corporate level, Unisys is

working to determine if the high risk SORs are used in the creation of Unisys purchased product. The goal of this effort is to either validate the intention of these SORs to achieve RMAP conformance within a prescribed period of time or, alternatively, to eliminate the use of these smelters by the relevant suppliers in the production of product being purchased by Unisys;

2. Unisys continues to work with its suppliers to maximize the use of conflict-free SORs in the manufacture of Unisys purchased parts, with emphasis on parts used in new Unisys products;
3. Unisys will continue to maintain awareness of latest industry developments and trends in Conflict Minerals due diligence processes and implement these into the Unisys risk assessment process, as applicable;
4. Unisys will again request information and supporting data from each supplier providing parts to Unisys that are subject to 2023 reporting requirements by utilizing the CMRT and will pursue completed template responses that identify material down to the smelter and mine;
5. Unisys will again follow its due diligence process to review and validate supplier responses that are obtained in support of Unisys 2023 Conflict Minerals reporting;
6. Unisys will continue to provide its Conflict Minerals Policy to suppliers as part of its reporting template-based supplier inquiry process for 2023; and
7. Unisys will continue to include within its purchase order standard terms and conditions a clause requiring suppliers to disclose to Unisys the existence and origin of any Conflict Minerals in any products supplied to Unisys. A similar clause is being added into new agreements and will be added to agreement renewals as appropriate.

### **2022 Conflict Minerals Reporting Summary**

Although Unisys' due diligence efforts determined that 344 of 349 SORs that were reported to Unisys from its in scope suppliers for 2022 were either not sourcing Conflict Minerals from DRC Covered Countries or were not supporting armed conflict, Unisys was unable to precisely determine the status of the five remaining SORs. Unisys will continue to work with its suppliers on their plans to eliminate these high risk SORs from their supply chains. Alternatively, if any of the subject five SORs will remain in 2023 reporting, Unisys will look to validate that they are not used in the creation of products provided to Unisys.

### **Product Description and List of Facilities**

A list of parts used in Unisys enterprise servers and other electronic equipment for which Unisys solicited supplier information regarding Conflict Mineral content or Conflict Mineral use in production is included in Exhibit A. A list of smelter facilities that, to the extent known, processed Conflict Minerals in Unisys products is included in Exhibit B.

## CONFLICT MINERALS REPORT

### EXHIBIT A

#### DESCRIPTION OF UNISYS CORPORATION'S 2022 PRODUCTS (PARTS/SUPPLIES)

Product Description (conflict mineral)
Cables & Harnesses * (tin, gold)
Computer Cabinets & Accessories (none)
Computer Products - Servers, Storage, Input/Output & other Peripherals * (tin, tantalum, tungsten, gold)
Displays / Monitors * (tin, tantalum, tungsten, gold)
Fasteners (none)
Keyboards * (tin, tantalum, tungsten, gold)
Labels (none)
Memory - Modules, * (tin, tantalum, tungsten, gold)
Network Switches * (tin, tantalum, tungsten, gold)
Power Strips * (tin, tantalum, tungsten, gold)
Power Supplies * (tin, tantalum, gold)
Printed Circuit Assemblies * (tin, tantalum, tungsten, gold)
Sheet Metal (none)
Electro-mechanical Assemblies * (tin, tantalum, tungsten, gold)
Solder * (tin)
Thermal Transfer Products (none)
Universal Serial Port (USB) Security Devices, Flash cards * (tin, gold)

\* Denotes Unisys Products known to contain Conflict Minerals - tin, tantalum, tungsten, or gold
