Unisys Corporation
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

In the opinion of management, the financial information furnished herein reflects all adjustments necessary for a fair presentation of the financial position, results of operations and cash flows for the interim periods specified. These adjustments consist only of normal recurring accruals except as disclosed herein. Because of seasonal and other factors, results for interim periods are not necessarily indicative of the results to be expected for the full year.

- a. The following table shows how earnings (loss) per share were computed for the three months ended March 31, 2005 and 2004 (dollars in millions, shares in thousands):

	Three Months Ended March 31,	
	2005	2004
Basic Earnings (Loss) Per Share		
Net income (loss)	\$ (45.5)	\$ 28.9
Weighted average shares	338,248	332,722
Basic earnings (Loss) per share	\$ (.13)	\$.09
Diluted Earnings (loss) Per Share		
Net income (loss)	\$ (45.5)	\$ 28.9
Weighted average shares	338,248	332,722
Plus incremental shares from assumed conversions of employee stock plans	-	5,326
Adjusted weighted average shares	338,248	338,048
Diluted earnings (loss) per share	\$ (.13)	\$.09

At March 31, 2005, no shares related to employee stock plans were included in the computation of diluted earnings per share since inclusion of these shares would be antidilutive because of the net loss incurred in the three months ended March 31, 2005.

- b. The company has two business segments: Services and Technology. Revenue classifications by segment are as follows: Services - consulting and systems integration, outsourcing, infrastructure services and core maintenance; Technology - enterprise-class servers and specialized technologies.

The accounting policies of each business segment are the same as those followed by the company as a whole. Intersegment sales and transfers are priced as if the sales or transfers were to third parties. Accordingly, the Technology segment recognizes intersegment revenue and manufacturing profit on hardware and software shipments to customers under Services contracts. The Services segment, in turn, recognizes customer revenue and marketing profits on such shipments of company hardware and software to customers. The Services segment also includes the sale of hardware and software products sourced from third parties that are sold to customers through the company's Services channels. In the company's consolidated statements of income, the manufacturing costs of products sourced from the Technology segment and sold to Services customers are reported in cost of revenue for Services.

Also included in the Technology segment's sales and operating profit are sales of hardware and software sold to the Services segment for internal use in Services engagements. The amount of such profit included in operating income of the Technology segment for the three months ended March 31, 2005 and 2004 was \$4.8 million and \$1.4 million, respectively. The profit on these transactions are eliminated in Corporate.

The company evaluates business segment performance on operating income exclusive of restructuring charges and unusual and nonrecurring items, which are included in Corporate. All other corporate and centrally incurred costs are allocated to the business segments based principally on revenue, employees, square footage or usage.

A summary of the company's operations by business segment for the three-month periods ended March 31, 2005 and 2004 is presented below (in millions of dollars):

Three Months Ended March 31, 2005 -----	Total -----	Corporate -----	Services -----	Technology -----
Customer revenue	\$1,366.6		\$1,107.7	\$ 258.9
Intersegment		\$(59.9)	4.8	55.1

	258.9	297.9
	-----	-----
Total	\$1,366.6	\$1,462.9
	=====	=====

- c. Recoverability of outsourcing assets is dependent on various factors, including the timely completion and ultimate cost of the outsourcing solution, realization of expected profitability of existing outsourcing contracts and obtaining additional outsourcing customers. The company quarterly compares the carrying value of the outsourcing assets with the undiscounted future cash flows expected to be generated by the outsourcing assets to determine if there is an impairment. If impaired, the outsourcing assets are reduced to an estimated fair value on a discounted cash flow approach. The company prepares its cash flow estimates based on assumptions that it believes to be reasonable but are also inherently uncertain. Actual future cash flows could differ from these estimates. At March 31, 2005, total outsourcing assets, net were \$433.3 million, approximately \$250 million of which relate to iPSL, a 51% owned U.K.-based company.
- d. Comprehensive income (loss) for the three months ended March 31, 2005 and 2004 includes the following components (in millions of dollars):

	2005	2004
	-----	-----
Net income (loss)	\$(45.5)	\$ 28.9
Other comprehensive income (loss)		
Cash flow hedges		
Income (loss), net of tax of \$1.3 and \$(1.0)	2.3	(1.6)
Reclassification adjustments, net of tax of \$.7 and \$1.7	1.4	3.1
Foreign currency translation adjustments	15.8	20.2
	-----	-----
Total other comprehensive income	19.5	21.7
	-----	-----
Comprehensive income (loss)	\$(26.0)	\$ 50.6
	=====	=====

Accumulated other comprehensive income (loss) as of December 31, 2004 and March 31, 2005 is as follows (in millions of dollars):

	Total	Translation Adjustments	Cash Flow Hedges	Minimum Pension Liability
	-----	-----	-----	-----
Balance at December 31, 2003	\$(2,011.9)	\$(679.7)	\$(6.6)	\$(1,325.6)
Change during period	7.4	43.5	3.1	(39.2)
	-----	-----	-----	-----
Balance at December 31, 2004	(2,004.5)	(636.2)	(3.5)	(1,364.8)
Change during period	19.5	15.8	3.7	-
	-----	-----	-----	-----
Balance at March 31, 2005	\$(1,985.0)	\$(620.4)	\$.2	\$(1,364.8)
	=====	=====	=====	=====

- e. The amount credited to stockholders' equity for the income tax benefit related to the company's stock plans for the three months ended March 31, 2005 and 2004 was \$.4 million and \$1.6 million, respectively. The company expects to realize these tax benefits on future Federal income tax returns.
- f. For equipment manufactured by the company, the company warrants that it will substantially conform to relevant published specifications for 12 months after shipment to the customer. The company will repair or replace, at its option and expense, items of equipment that do not meet this warranty. For company software, the company warrants that it will conform substantially to then-current published functional specifications for 90 days from customer's receipt. The company will provide a workaround or correction for material errors in its software that prevents its use in a production environment.

The company estimates the costs that may be incurred under its warranties and records a liability in the amount of such costs at the time revenue is recognized. Factors that affect the company's warranty liability include the number of units sold, historical and anticipated rates of warranty claims and cost per claim. The company quarterly assesses the adequacy of its recorded warranty liabilities and adjusts the amounts as necessary. Presented below is a reconciliation of the aggregate product warranty liability (in millions of dollars):

Three Months Ended March 31,	

2005	2004
----	----

The company currently expects to make cash contributions of approximately \$70 million to its worldwide defined benefit pension plans in 2005 compared with \$62.8 million in 2004. For the three months ended March 31, 2005 and 2004, \$15.6 million and \$12.0 million, respectively of cash contributions have been made. In accordance with regulations governing contributions to U.S. defined benefit pension plans, the company is not required to fund its U.S. qualified defined benefit pension plan in 2005.

Net periodic postretirement benefit expense for the three months ended March 31, 2005 and 2004 is presented below (in millions of dollars):

	Three Months Ended March 31,	
	2005	2004
	----	----
Interest cost	\$3.5	\$3.5
Expected return on assets	(.1)	-
Amortization of prior service benefit	(.5)	(.5)
Recognized net actuarial loss	1.6	1.0
	----	----
Net periodic postretirement benefit expense	\$4.5	\$4.0
	=====	=====

The company expects to make cash contributions of approximately \$27 million to its postretirement benefit plan in 2005. For the three months ended March 31, 2005 and 2004, \$7.4 million and \$6.0 million, respectively of cash contributions have been made.

- i. Cash paid during the three months ended March 31, 2005 and 2004 for income taxes was \$41.3 million and \$18.4 million, respectively.

Cash paid during the three months ended March 31, 2005 and 2004 for interest was \$16.5 million and \$16.1 million, respectively.

- j. Following is a breakdown of the individual components of the 2004 cost reduction action charge (in millions of dollars):

	Headcount	Total	Work Force Reductions*		Idle Lease Cost
			U.S.	Int'l.	
	-----	-----	-----	-----	-----
Balance at Dec. 31, 2004	851	\$81.1	\$22.5	\$52.9	\$5.7
Utilized	(401)	(12.6)	(6.6)	(5.1)	(.9)
Changes in estimates and revisions		(3.7)	.1	(3.9)	.1
Translation adjustments		(1.6)		(1.6)	
	-----	-----	-----	-----	-----
Balance at March 31, 2005	450	\$63.2	\$16.0	\$42.3	\$4.9
	=====	=====	=====	=====	=====
Expected future utilization:					
2005 remaining nine months	450	\$50.1	\$16.0	\$32.2	\$1.9
2006 and thereafter		13.1		10.1	3.0
	-----	-----	-----	-----	-----

* Includes severance, notice pay, medical and other benefits.

Cash expenditures related to the above actions, as well as cost reduction actions taken in years prior to 2004, for the three months ended March 31, 2005 and 2004 were approximately \$14.3 million and \$4.0 million, respectively.

- k. In December 2004, the Financial Accounting Standards Board (FASB) issued FASB Staff Position No. FAS 109-2 (FSP No. 109-2), "Accounting and Disclosure Guidance for the Foreign Earnings Repatriation Provisions within the American Jobs Creation Act of 2004" (the Jobs Act). FSP No. 109-2 provides guidance with respect to reporting the potential impact of the

repatriation provisions of the Jobs Act on an enterprise's income tax expense and deferred tax liability. The Jobs Act was enacted on October 22, 2004, and provides for a temporary 85% dividends received deduction on certain foreign earnings repatriated during a one-year period. The deduction would result in an approximate 5.25% federal tax rate on the repatriated earnings. To qualify for the deduction, the earnings must be reinvested in the United States pursuant to a domestic reinvestment plan established by a company's chief executive officer and approved by a company's board of directors. Certain other criteria in the Jobs Act must be satisfied as well. FSP No. 109-2 states that an enterprise is allowed time beyond the financial reporting period to evaluate the effect of the Jobs Act on its plan for reinvestment or repatriation of foreign earnings.

Although the company has not yet completed its evaluation of the impact of the repatriation provisions of the Jobs Act, the company does not expect that these provisions will have a material impact on its consolidated financial position, consolidated results of operations, or liquidity. Accordingly, as provided for in FSP No. 109-2, the company has not adjusted its tax expense or deferred tax liability to reflect the repatriation provisions of the Jobs Act.

In December 2004, the FASB issued Statement of Financial Accounting Standards (SFAS) No. 123 (revised 2004), "Share-Based Payment" (SFAS No. 123R), which replaces SFAS No. 123 and supersedes APB Opinion No. 25, "Accounting for Stock Issued to Employees." SFAS No. 123R requires all share-based payments to employees, including grants of employee stock options, to be recognized in the financial statements based on their fair values. The pro forma disclosures previously permitted under SFAS No. 123 no longer will be an alternative to financial statement recognition. In accordance with a recently-issued Securities and Exchange Commission rule, companies will be allowed to implement SFAS No. 123R as of the beginning of the first interim or annual period that begins after June 15, 2005. The company currently expects that it will adopt SFAS No. 123R on January 1, 2006. Under SFAS No. 123R, the company must determine the appropriate fair value model to be used for valuing share-based payments, the amortization method for compensation cost and the transition method to be used at date of adoption. The permitted transition methods include either retrospective or prospective adoption. Under the retrospective method, prior periods may be restated either as of the beginning of the year of adoption or for all periods presented. The prospective method requires that compensation expense be recorded for all unvested stock options at the beginning of the first quarter of adoption of SFAS No. 123R, while the retrospective methods would record compensation expense for all unvested stock options beginning with the first period presented. The company is currently evaluating the requirements of SFAS No. 123R and expects that adoption of SFAS No. 123R will have a material impact on the company's consolidated financial position and consolidated results of operations. The company has not yet determined the method of adoption or the effect of adopting SFAS No. 123R, and it has not determined whether the adoption will result in amounts that are similar to the current pro forma disclosures under SFAS No. 123. See note g.

In December 2004, the FASB issued SFAS No. 153, "Exchanges of Nonmonetary Assets, an amendment of APB Opinion No. 29, Accounting for Nonmonetary Transactions" (SFAS No. 153). SFAS No. 153 eliminates the exception from fair value measurement for nonmonetary exchanges of similar productive assets in paragraph 21 (b) of APB Opinion No. 29, "Accounting for Nonmonetary Transactions," and replaces it with an exception for exchanges that do not have commercial substance. SFAS No. 153 specifies that a nonmonetary exchange has commercial substance if the future cash flows of the entity are expected to change significantly as a result of the exchange. SFAS No. 153 is effective for periods beginning after June 15, 2005. The company does not expect that adoption of SFAS No. 153 will have a material effect on its consolidated financial position, consolidated results of operations, or liquidity.

In November 2004, the FASB issued SFAS No. 151, "Inventory Costs an amendment of ARB No. 43, Chapter 4" (SFAS No. 151). SFAS No. 151 amends the guidance in ARB No. 43, Chapter 4, "Inventory Pricing," to clarify the accounting for abnormal amounts of idle facility expense, handling costs and wasted material (spoilage). Among other provisions, the new rule requires that such items be recognized as current-period charges, regardless of whether they meet the criterion of "so abnormal" as stated in ARB No. 43. SFAS No. 151 is effective for fiscal years beginning after June 15, 2005. The company does not expect that adoption of SFAS No. 151 will have a material effect on its consolidated financial position, consolidated results of operations, or liquidity.

In May 2004, the FASB issued Staff Position No. FAS 106-2 (FSP No. 106-2), "Accounting and Disclosure Requirements Related to the Medicare Prescription Drug, Improvement and Modernization Act of 2003" (the Act). The Act introduces a prescription drug benefit under Medicare, as well as a federal subsidy to sponsors of retiree health care benefit plans that provide a benefit that is at least actuarially equivalent to Medicare Part D. FSP No. 106-2 is effective for the first interim period beginning after June 15, 2004, and provides that an employer shall measure the accumulated plan benefit obligation (APBO) and net periodic postretirement benefit cost, taking into account any subsidy received under the Act. As of March 31, 2005, the company's measurements of both the APBO and the net postretirement benefit cost do not reflect any amounts associated with the subsidy. Final regulations implementing the Act were issued on January 21, 2005. The final regulations clarify how a company should determine actuarial equivalency and the definition of a plan for purposes of determining actuarial equivalency. The company is currently evaluating these regulations and has not yet determined what effect adoption of FSP No. 106-2 will have on its consolidated financial position, consolidated results of operations, or liquidity.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Overview

The company's financial results for the first quarter of 2005 were impacted by a number of factors that resulted in lower earnings compared with the year-ago period. First, the company continued to be impacted by operational issues in several of its large, transformational business process outsourcing engagements. These contracts involve transitioning from the client's legacy environment to a new, state-of-the-art environment with new processes and software. It has taken the company longer than anticipated to develop the new software and transition to the new processes. This has resulted in higher-than-expected costs on the contracts, not only in terms of creating the new technology and processes, but also in the salary costs involved in the legacy operation. The company is addressing these execution issues but expects the issues to continue to impact its 2005 results. Second, the company experienced lower demand for project-based assignments and for its proprietary maintenance services. The maintenance services decline was due to server and payment system consolidations and reductions in certain client accounts. Given the high profitability of these services, the lower demand impacted the company's margins in its services business. Third, in its Technology segment, revenues declined 13% primarily driven by a 37% decline in sales of specialized equipment. In addition, the company experienced a decline in sales of large enterprise servers. Lower sales of these systems, which are highly profitable, contributed to the lower earnings in 2005. Finally, the company continues to be impacted by significantly higher pension expense. Pretax pension expense in the first quarter of 2005 increased to \$47 million compared to \$22 million in the year-ago quarter. The company expects the challenges in the outsourcing engagements, the lower proprietary maintenance revenue, the weakness in high-end enterprise server sales, and the higher pension expense to continue to impact its financial results in 2005.

Results of Operations

For the three months ended March 31, 2005, the company reported a net loss of \$45.5 million, or \$.13 per share, compared with net income of \$28.9 million, or \$.09 per share, for the three months ended March 31, 2004.

Total revenue for the quarter ended March 31, 2005 was \$1.37 billion, down 7% from revenue of \$1.46 billion for the quarter ended March 31, 2004. Foreign currency translations had a 2% positive impact on revenue in the quarter when compared with the year-ago period. In the current quarter, Services revenue decreased 5% and Technology revenue decreased 13%.

U.S. revenue decreased 9% in the first quarter compared with the year-ago period and revenue in international markets decreased 4% due to decreases in Europe and Latin America which were partially offset by an increase in Pacific/Asia.

Pension expense for the three months ended March 31, 2005 was \$46.8 million compared with \$22.2 million of pension expense for the three months ended March 31, 2004. The increase in pension expense was due to the following: (1) a decline in the discount rate used for the U.S. pension plan to 5.88% at December 31, 2004 from 6.25% at December 31, 2003, (2) an increase in amortization of net unrecognized losses for the U.S. plan, and (3) for international plans, declines in discount rates and currency translation. The company records pension expense, as well as other employee-related costs such as payroll taxes and medical insurance costs, in operating income in the following income statement categories: cost of sales; selling, general and administrative expenses; and research and development expenses. The amount allocated to each category is based on where the salaries of the active employees are charged. The company currently expects to report pension expense of approximately \$186.0 million in 2005 compared with pension expense of \$93.6 million in 2004.

Total gross profit margin was 19.0% in the first quarter of 2005 compared with 26.8% in the year-ago period. The change principally reflects higher pension expense of \$32.8 million in the current quarter compared with pension expense of \$15.5 million in the year-ago quarter, as well as operational issues in several outsourcing contracts.

For the three months ended March 31, 2005, selling, general and administrative expenses were \$261.6 million (19.1% of revenue) compared with \$261.2 million (17.9% of revenue) for the three months ended March 31, 2004. The three months ended March 31, 2005 includes \$9.1 million of pension expense compared with \$4.9 million in the year-ago period.

Research and development (R&D) expense was \$64.9 million compared with \$71.5 million a year ago. The company continues to invest in high-end Cellular MultiProcessing server technology and in key programs within its industry practices. R&D in the current period includes \$4.9 million of pension expense compared with pension expense of \$1.8 million in the year-ago period.

For the first quarter of 2005, the company reported a pretax operating loss of \$66.2 million compared with pretax income of \$58.8 million a year ago. The change resulted principally (a) from increased pension expense of \$46.8 million in the current quarter compared with pension expense of \$22.2 million in the year-ago period, (b) execution issues in several outsourcing contracts, and (c) lower revenue levels.

Interest expense for the three months ended March 31, 2005 was \$12.6 million compared with \$17.0 million for the three months ended March 31, 2004. The decrease was principally due to the January 2005 retirement at maturity of all of the company's \$150 million 7 1/4% senior notes.

Other income (expense), net was income of \$.5 million in the current quarter compared with income of \$.6 million in the year-ago quarter.

Income (loss) before income taxes was a loss of \$78.3 million in the first quarter of 2005 compared with income of \$42.4 million last year. The provision for income taxes was a benefit of \$32.8 million in the current period compared with a provision of \$13.5 million in the year-ago period. In the current period tax benefit, the company recorded a tax benefit of \$7.8 million related to a favorable decision in foreign tax litigation. The company expects to receive a cash refund of such taxes in the second quarter of 2005.

Segment results

- - - - -

The company has two business segments: Services and Technology. Revenue classifications are as follows: Services - consulting and systems integration, outsourcing, infrastructure services, and core maintenance; Technology - enterprise-class servers and specialized technologies. The accounting policies of each business segment are the same as those followed by the company as a whole. Intersegment sales and transfers are priced as if the sales or transfers were to third parties. Accordingly, the Technology segment recognizes intersegment revenue and manufacturing profit on hardware and software shipments to customers under Services contracts. The Services segment, in turn, recognizes customer revenue and marketing profit on such shipments of company hardware and software to customers. The Services segment also includes the sale of hardware and software products sourced from third parties that are sold to customers through the company's Services channels. In the company's consolidated statements of income, the manufacturing costs of products sourced from the Technology segment and sold to Services customers are reported in cost of revenue for Services.

Also included in the Technology segment's sales and operating profit are sales of hardware and software sold to the Services segment for internal use in Services engagements. The amount of such profit included in operating income of the Technology segment for the three months ended March 31, 2005 and 2004, was \$4.8 million and \$1.4 million, respectively. The profit on these transactions is eliminated in Corporate.

The company evaluates business segment performance on operating income exclusive of restructuring charges and unusual and nonrecurring items, which are included in Corporate. All other corporate and centrally incurred costs are allocated to the business segments based principally on revenue, employees, square footage or usage.

Information by business segment is presented below (in millions of dollars):

	Total	Elimi- nations	Services	Technology
	-----	-----	-----	-----
Three Months Ended March 31, 2005				
Customer revenue	\$1,366.6		\$1,107.7	\$258.9
Intersegment		\$(59.9)	4.8	55.1
Total revenue	\$1,366.6	\$(59.9)	\$1,112.5	\$314.0
Gross profit percent	19.0%		11.0%	47.7%
Operating income (loss) percent	(4.8)%		(6.8)%	6.1%
Three Months Ended March 31, 2004				
Customer revenue	\$1,462.9		\$1,165.0	\$297.9
Intersegment		\$(45.7)	4.8	40.9
Total revenue	\$1,462.9	\$(45.7)	\$1,169.8	\$338.8
Gross profit percent	26.8%		19.1%	48.3%
Operating income percent	4.0%		2.5%	8.6%

Gross profit percent and operating income percent are as a percent of total revenue.

In the Services segment, customer revenue was \$1.11 billion for the three months ended March 31, 2005, down 5% compared with \$1.17 billion for the three months ended March 31, 2004. Foreign currency translations had about a 3% positive impact on Services revenue in the quarter when compared with the year-ago period. The decrease in Services revenue was due to an 5% decrease in outsourcing (\$421 million in 2005 compared with \$443 million in 2004), a 2% decrease in consulting and systems integration (\$370 compared with \$377 million in 2004), a 10% decrease in core maintenance revenue (\$131 million in 2005 compared with \$145 million in 2004) and a 7% decrease in infrastructure services revenue (\$186 million in 2005 compared with \$200 million in 2004). Services gross profit was 11.0% for the three months ended March 31, 2005 compared with 19.1% in the year-ago period. Included in gross profit was the impact of pension expense of \$31.8 million in the current period compared with pension expense of \$15.2 million in the year-ago period. Services operating income (loss) percent was (6.8)% for the three months ended March 31, 2005 compared with 2.5% last year. Included in operating income (loss) was the impact of pension expense of \$39.4 million in the current quarter compared with pension expense of \$19.3 million in the year-ago period. In addition, the current year gross profit and operating profit margins were negatively impacted by operational issues in several outsourcing contracts, weakness in project-based assignments and the decline in core maintenance.

In the Technology segment, customer revenue was \$259 million for the three months ended March 31, 2005, down 13% compared with \$298 million for the three months ended March 31, 2004. Foreign currency translations had about a 2% positive impact on Technology revenue in the quarter when compared with the year-ago period. The decrease in revenue was due to a 37% decrease in sales of specialized technology products (\$61 million in 2005 compared with \$96 million in 2004) and a 2% decline in sales of enterprise-class servers (\$198 million in 2005 compared with \$202 million in 2004). Technology gross profit was 47.7% for the three months ended March 31, 2005 compared with 48.3% in the year-ago period, and Technology operating income percent was 6.1% for the three months ended March 31, 2005 compared with 8.6% last year. The margin declines primarily reflected a lower proportion of high-end, higher-margin ClearPath products as well as pension expense of \$7.4 million in the current period compared with pension expense of \$2.9 million in the prior-year period.

New Accounting Pronouncements

In December 2004, the Financial Accounting Standards Board (FASB) issued FASB Staff Position No. FAS 109-2 (FSP No. 109-2), "Accounting and Disclosure Guidance for the Foreign Earnings Repatriation Provisions within the American Jobs Creation Act of 2004" (the Jobs Act). FSP No. 109-2 provides guidance with respect to reporting the potential impact of the repatriation provisions of the Jobs Act on an enterprise's income tax expense and deferred tax liability. The Jobs Act was enacted on October 22, 2004, and provides for a temporary 85% dividends received deduction on certain foreign earnings repatriated during a one-year period. The deduction would result in an approximate 5.25% federal tax rate on the repatriated earnings. To qualify for the deduction, the earnings must be reinvested in the United States pursuant to a domestic reinvestment plan established by a company's chief executive officer and approved by a company's board of directors. Certain other criteria in the Jobs Act must be satisfied as well. FSP No. 109-2 states that an enterprise is allowed time beyond the financial reporting period to evaluate the effect of the Jobs Act on its plan for reinvestment or repatriation of foreign earnings. Although the company has not yet completed its evaluation of the impact of the repatriation provisions of the Jobs Act, the company does not expect that these provisions will have a material impact on its consolidated financial position, consolidated results of operations, or liquidity. Accordingly, as provided for in FSP No. 109-2, the company has not adjusted its tax expense or deferred tax liability to reflect the repatriation provisions of the Jobs Act.

In December 2004, the FASB issued Statement of Financial Accounting Standards (SFAS) No. 123 (revised 2004), "Share-Based Payment" (SFAS No. 123R), which replaces SFAS No. 123 and supersedes APB Opinion No. 25, "Accounting for Stock Issued to Employees." SFAS No. 123R requires all share-based payments to employees, including grants of employee stock options, to be recognized in the financial statements based on their fair values. The pro forma disclosures previously permitted under SFAS No. 123 no longer will be an alternative to financial statement recognition. In accordance with a recently-issued Securities and Exchange Commission rule, companies will be allowed to implement SFAS No. 123R as of the beginning of the first interim or annual period that begins after June 15, 2005. The company currently expects that it will adopt SFAS No. 123R on January 1, 2006. Under SFAS No. 123R, the company must determine the appropriate fair value model to be used for valuing share-based payments, the amortization method for compensation cost and the transition method to be used at date of adoption. The permitted transition methods include either retrospective or prospective adoption. Under the retrospective method, prior periods may be restated either as of the beginning of the year of adoption or for all periods presented. The prospective method requires that compensation expense be recorded for all unvested stock options at the beginning of the first quarter of adoption of SFAS No. 123R, while the retrospective methods would record compensation expense for all unvested stock options beginning with the first period presented. The company is currently evaluating the requirements of SFAS No. 123R and expects that adoption of SFAS No. 123R will have a material impact on the company's consolidated financial position and consolidated results of operations. The company has not yet determined the method of adoption or the effect of adopting SFAS No. 123R, and it has not determined whether the adoption will result in amounts that are similar to the current pro forma disclosures under SFAS No. 123. See note g.

In December 2004, the FASB issued SFAS No. 153, "Exchanges of Nonmonetary Assets, an amendment of APB Opinion No. 29, Accounting for Nonmonetary Transactions" (SFAS No. 153). SFAS No. 153 eliminates the exception from fair value measurement for nonmonetary exchanges of similar productive assets in paragraph 21 (b) of APB Opinion No. 29, "Accounting for Nonmonetary Transactions," and replaces it with an exception for exchanges that do not have commercial substance. SFAS No. 153 specifies that a nonmonetary exchange has commercial substance if the future cash flows of the entity are expected to change significantly as a result of the exchange. SFAS No. 153 is effective for periods beginning after June 15, 2005. The company does not expect that adoption of SFAS No. 153 will have a material effect on its consolidated financial position, consolidated results of operations, or liquidity.

In November 2004, the FASB issued SFAS No. 151, "Inventory Costs an amendment of ARB No. 43, Chapter 4" (SFAS No. 151). SFAS No. 151 amends the guidance in ARB No. 43, Chapter 4, "Inventory Pricing," to clarify the accounting for abnormal amounts of idle facility expense, handling costs and wasted material (spoilage). Among other provisions, the new rule requires that such items be recognized as current-period charges, regardless of whether they meet the criterion of "so abnormal" as stated in ARB No. 43. SFAS No. 151 is effective for fiscal years

beginning after June 15, 2005. The company does not expect that adoption of SFAS No. 151 will have a material effect on its consolidated financial position, consolidated results of operations, or liquidity.

In May 2004, the FASB issued Staff Position No. FAS 106-2 (FSP No. 106-2), "Accounting and Disclosure Requirements Related to the Medicare Prescription Drug, Improvement and Modernization Act of 2003" (the Act). The Act introduces a prescription drug benefit under Medicare, as well as a federal subsidy to sponsors of retiree health care benefit plans that provide a benefit that is at least actuarially equivalent to Medicare Part D. FSP No. 106-2 is effective for the first interim period beginning after June 15, 2004, and provides that an employer shall measure the accumulated plan benefit obligation (APBO) and net periodic postretirement benefit cost, taking into account any subsidy received under the Act. As of March 31, 2005, the company's measurements of both the APBO and the net postretirement benefit cost do not reflect any amounts associated with the subsidy. Final regulations implementing the Act were issued on January 21, 2005. The final regulations clarify how a company should determine actuarial equivalency and the definition of a plan for purposes of determining actuarial equivalency. The company is currently evaluating these regulations and has not yet determined what effect adoption of FSP No. 106-2 will have on its consolidated financial position, consolidated results of operations, or liquidity.

Financial Condition

- - - - -

Cash and cash equivalents at March 31, 2005 were \$441.6 million compared with \$660.5 million at December 31, 2004.

During the three months ended March 31, 2005, cash provided by operations was \$26.8 million compared with cash provided by operations of \$129.2 million for the three months ended March 31, 2004. Operating cash flow decreased principally due to lower earnings. Cash expenditures in the current quarter related to prior-year restructuring charges (which are included in operating activities) were approximately \$14 million compared with \$4 million for the prior-year quarter, and are expected to be approximately \$57 million for the remainder of 2005 and \$22 million in total for all subsequent years, principally for work-force reductions and idle lease costs. In the second quarter of 2005, the company expects to receive approximately \$48 million of income tax refunds of which \$40 million represents the U.S. Internal Revenue Service (IRS) tax audit settlement in 2004 and \$8 million represents the foreign refund discussed above.

Cash used for investing activities for the three months ended March 31, 2005 was \$94.2 million compared with \$118.5 million during the three months ended March 31, 2004. The decrease in cash used was principally due to net proceeds of investments of \$3.1 million in the current quarter compared with net purchases of \$5.4 million in the prior-year period. In addition, the current period investment in marketable software was \$33.0 million compared with \$29.0 million in the prior-year. Capital additions of properties were \$22.4 million for the three months ended March 31, 2005 compared with \$36.5 million in the prior-year period. Capital additions of outsourcing assets were \$41.9 million for the three months ended March 31, 2005 compared with \$47.6 million in the prior-year period.

Cash used for financing activities during the current quarter was \$142.0 million compared with cash provided of \$20.7 million in the prior year. The current period includes cash expenditures of \$150.0 million to retire at maturity all of the company's 7 1/4% senior notes.

At March 31, 2005, total debt was \$.9 billion, a decrease of \$148.3 million from December 31, 2004.

The company has a \$500 million credit agreement that expires in May 2006. As of March 31, 2005, there were no borrowings under this facility, and the entire \$500 million was available for borrowings. Borrowings under the agreement bear interest based on the then-current LIBOR or prime rates and the company's credit rating. The credit agreement contains financial and other covenants, including maintenance of certain financial ratios, a minimum level of net worth and limitations on certain types of transactions, which could reduce the amount the company is able to borrow. Events of default under the credit agreement include failure to perform covenants, material adverse change, change of control and default under other debt aggregating at least \$25 million. If an event of

default were to occur under the credit agreement, the lenders would be entitled to declare all amounts borrowed under it immediately due and payable. The occurrence of an event of default under the credit agreement could also cause the acceleration of obligations under certain other agreements and the termination of the company's U.S. trade accounts receivable facility, described below.

In addition, the company and certain international subsidiaries have access to uncommitted lines of credit from various banks. Other sources of short-term funding are operational cash flows, including customer prepayments, and the company's U.S. trade accounts receivable facility. Using this facility, the company sells, on an on-going basis, up to \$225 million of its eligible U.S. trade accounts receivable through a wholly owned subsidiary, Unisys Funding Corporation I. The facility is renewable annually at the purchasers' option and expires in December 2006. At both March 31, 2005 and at December 31, 2004, the company had sold \$225 million of eligible receivables.

At March 31, 2005, the company has met all covenants and conditions under its various lending and funding agreements. Since the company expects to continue to meet these covenants and conditions, the company believes that it has adequate sources and availability of short-term funding to meet its expected cash requirements.

The company may, from time to time, redeem, tender for, or repurchase its securities in the open market or in privately negotiated transactions depending upon availability, market conditions and other factors.

The company has on file with the Securities and Exchange Commission a registration statement covering \$1.2 billion of debt or equity securities, which enables the company to be prepared for future market opportunities.

The company accounts for income taxes in accordance with SFAS No. 109, "Accounting for Income Taxes," which requires that deferred tax assets and liabilities be recognized using enacted tax rates for the effect of temporary differences between the book and tax bases of recorded assets and liabilities. SFAS No. 109 also requires that deferred tax assets be reduced by a valuation allowance if it is more likely than not that some portion or the entire deferred tax asset will not be realized.

At March 31, 2005, the company had deferred tax assets in excess of deferred tax liabilities of \$2,147 million. For the reasons cited below, management determined that it is more likely than not that \$1,625 million of such assets will be realized, therefore resulting in a valuation allowance of \$522 million.

The company evaluates quarterly the realizability of its deferred tax assets by assessing its valuation allowance and by adjusting the amount of such allowance, if necessary. The factors used to assess the likelihood of realization are the company's forecast of future taxable income and available tax planning strategies that could be implemented to realize the net deferred tax assets. The company has used tax-planning strategies to realize or renew net deferred tax assets to avoid the potential loss of future tax benefits.

In addition to the repatriation provisions discussed above, the Jobs Act extends the excess foreign tax credit carry forward period from five to 10 years and limits the carry back period to one year. The company's deferred tax asset included approximately \$183 million of foreign tax credit carry forwards. The Jobs Act should provide the company with additional opportunities to fully utilize this portion of the deferred tax asset.

Approximately \$4.9 billion of future taxable income (predominately U.S.) ultimately is needed to realize the net deferred tax assets at March 31, 2005. Failure to achieve forecasted taxable income might affect the ultimate realization of the net deferred tax assets. Factors that may affect the company's ability to achieve sufficient forecasted taxable income include, but are not limited to, the following: increased competition, a continuing decline in sales or margins, loss of market share, delays in product availability or technological obsolescence. See "Factors that may affect future results" below.

The company's annual provision for income taxes and the determination of the resulting deferred tax assets and liabilities involve a significant amount of management judgment and are based on the best information available at the time. The company operates within federal, state and international taxing jurisdictions and is subject to audit in these jurisdictions. These audits can involve complex issues, which may require an extended period of time to resolve.

As a result, the actual income tax liabilities to the jurisdictions with respect to any fiscal year are ultimately determined long after the financial statements have been published. The company maintains reserves for estimated tax exposures. Income tax exposures include potential challenges of research and development credits and intercompany pricing. Exposures are settled primarily through the settlement of audits within these tax jurisdictions, but can also be affected by changes in applicable tax law or other factors, which could cause management of the company to believe a revision of past estimates is appropriate. Management believes that an appropriate liability has been established for estimated exposures; however, actual results may differ materially from these estimates. The liabilities are reviewed quarterly for their adequacy and appropriateness. As of March 31, 2005, the IRS was in the process of examining Unisys U.S. Federal Income tax returns for the fiscal years 1997 through 1999. The company anticipates the examination of these years will be completed in 2005. The company expects that the audit of 2000 through 2003 will commence in 2005. The liabilities, if any, associated with these years will ultimately be resolved when events such as the completion of audits by the taxing jurisdictions occur. To the extent the audits or other events result in a material adjustment to the accrued estimates, the effect would be recognized in the provision for income taxes line in the company's Consolidated Statement of Income in the period of the event.

Stockholders' equity decreased \$14.0 million during the three months ended March 31, 2005, principally reflecting the net loss of \$45.5 million, offset in part by \$11.5 million for issuance of stock under stock option and other plans, \$.4 million of tax benefits related to employee stock plans and currency translation of \$15.8 million.

At December 31 of each year, accounting rules require a company to recognize a liability on its balance sheet for each defined benefit pension plan if the fair value of the assets of that pension plan is less than the present value of the pension obligation (the accumulated benefit obligation, or ABO). This liability is called a "minimum pension liability." Concurrently, any existing prepaid pension asset for the pension plan must be removed. These adjustments are recorded as a charge in "accumulated other comprehensive income (loss)" in stockholders' equity. If at any future year-end, the fair value of the pension plan assets exceeds the ABO, the charge to stockholders' equity would be reversed for such plan. Alternatively, if the fair market values of pension plan assets experience further declines or the discount rate is reduced, additional charges to accumulated other comprehensive income (loss) may be required at a future year-end.

At December 31, 2004, the difference between the ABO and the fair value of pension plan assets increased from the amount at December 31, 2003. As a result at December 31, 2004, the company adjusted its minimum pension liability adjustment as follows: increased its pension plan liabilities by approximately \$95 million, increased its investments at equity by approximately \$27 million relating to the company's share of the change in NUL's minimum pension liability, increased prepaid pension asset by \$13 million, and offset these changes by an increase in other comprehensive loss of approximately \$55 million, or \$39 million net of tax.

This accounting treatment has no effect on the company's net income, liquidity or cash flows. Financial ratios and net worth covenants in the company's credit agreements and debt securities are unaffected by charges or credits to stockholders' equity caused by adjusting a minimum pension liability.

In accordance with regulations governing contributions to U.S. defined benefit pension plans, the company is not required to fund its U.S. qualified defined benefit plan in 2005. The company expects to make cash contributions of approximately \$70 million to its other defined benefit pension plans during 2005.

Factors That May Affect Future Results

From time to time, the company provides information containing "forward-looking" statements, as defined in the Private Securities Litigation Reform Act of 1995. Forward-looking statements provide current expectations of future events and include any statement that does not directly relate to any historical or current fact. Words such as "anticipates," "believes," "expects," "intends," "plans," "projects" and similar expressions may identify such forward-looking statements. All forward-looking statements rely on assumptions and are subject to risks, uncertainties and other factors that could cause the company's actual results to differ materially from expectations. Other factors that could affect future

results include, but are not limited to, those discussed below. Any forward-looking statement speaks only as of the date on which that statement is made. The company assumes no obligation to update any forward-looking statement to reflect events or circumstances that occur after the date on which the statement is made.

The company's business is affected by changes in general economic and business conditions. The company continues to face a highly competitive business environment and economic weakness in certain geographic regions. In this environment, many organizations continue to delay planned purchases of information technology products and services. If the level of demand for the company's products and services declines in the future, the company's business could be adversely affected. The company's business could also be affected by acts of war, terrorism or natural disasters. Current world tensions could escalate, and this could have unpredictable consequences on the world economy and on the company's business.

The information services and technology markets in which the company operates include a large number of companies vying for customers and market share both domestically and internationally. The company's competitors include consulting and other professional services firms, systems integrators, outsourcing providers, infrastructure services providers, computer hardware manufacturers and software providers. Some of the company's competitors may develop competing products and services that offer better price-performance or that reach the market in advance of the company's offerings. Some competitors also have or may develop greater financial and other resources than the company, with enhanced ability to compete for market share, in some instances through significant economic incentives to secure contracts. Some also may be better able to compete for skilled professionals. Any of these factors could have an adverse effect on the company's business. Future results will depend on the company's ability to mitigate the effects of aggressive competition on revenues, pricing and margins and on the company's ability to attract and retain talented people.

The company operates in a highly volatile industry characterized by rapid technological change, evolving technology standards, short product life cycles and continually changing customer demand patterns. Future success will depend in part on the company's ability to anticipate and respond to these market trends and to design, develop, introduce, deliver or obtain new and innovative products and services on a timely and cost-effective basis. The company may not be successful in anticipating or responding to changes in technology, industry standards or customer preferences, and the market may not demand or accept its services and product offerings. In addition, products and services developed by competitors may make the company's offerings less competitive.

The company's future results will depend in part on its ability to grow outsourcing and infrastructure services. The company's outsourcing contracts are multiyear engagements under which the company takes over management of a client's technology operations, business processes or networks. The company will need to maintain a strong financial position to grow its outsourcing business. In a number of these arrangements, the company hires certain of its clients' employees and may become responsible for the related employee obligations, such as pension and severance commitments. In addition, system development activity on outsourcing contracts may require the company to make significant upfront investments.

Recoverability of outsourcing assets is dependent on various factors, including the timely completion and ultimate cost of the outsourcing solution, realization of expected profitability of existing outsourcing contracts and obtaining additional outsourcing customers. These risks could result in an impairment of a portion of the associated assets, which are tested for recoverability quarterly.

As long-term relationships, outsourcing contracts provide a base of recurring revenue. However, outsourcing contracts are highly complex and can involve the design, development, implementation and operation of new solutions and the transitioning of clients from their existing business processes to the new environment. In the early phases of these contracts, gross margins may be lower than in later years when an integrated solution has been implemented, the duplicate costs of transitioning from the old to the new system have been eliminated and the work force and facilities have been rationalized for efficient operations. Future results will depend on the company's ability to effectively and timely complete these implementations, transitions and rationalizations.

Future results will also depend in part on the company's ability to drive profitable growth in consulting and systems integration. The company's ability to grow profitably in this business will depend in part on an improvement in economic conditions and a pick-up in demand for systems integration projects. It will also depend on the success of the actions the company has taken to enhance the skills base and management team in this business and to refocus parts of the business on integrating best-of-breed, standards-based solutions to solve client needs. In addition, profit margins in this business are largely a function of the rates the company is able to charge for services and the chargeability of its professionals. If the company is unable to maintain the rates it charges or appropriate chargeability for its professionals, profit margins will suffer. The rates the company is able to charge for services are affected by a number of factors, including clients' perception of the company's ability to add value through its services; introduction of new services or products by the company or its competitors; pricing policies of competitors; and general economic conditions. Chargeability is also affected by a number of factors, including the company's ability to transition employees from completed projects to new engagements, and its ability to forecast demand for services and thereby maintain an appropriate head count.

Future results will also depend, in part, on market acceptance of the company's high-end enterprise servers. In its technology business, the company is focusing its resources on creating and enhancing a common high-performance platform for both its proprietary operating environments and open standards-based operating environments such as Microsoft Windows and Linux. In addition, the company is applying its resources to develop value-added software capabilities and optimized solutions for these server platforms which provide competitive differentiation. The high-end enterprise server platforms are based on its Cellular MultiProcessing (CMP) architecture. The company's CMP servers are designed to provide mainframe-class capabilities with compelling price performance by making use of standards-based technologies such as Intel chips and supporting industry standard software. The company has transitioned both its legacy ClearPath servers and its Intel-based ES7000s to the CMP platform. Future results will depend, in part, on customer acceptance of the new CMP-based ClearPath Plus systems and the company's ability to maintain its installed base for ClearPath and to develop next-generation ClearPath products that are purchased by the installed base. In addition, future results will depend, in part, on the company's ability to generate new customers and increase sales of the Intel-based ES7000 line. The company believes there is significant growth potential in the developing market for high-end, Intel-based servers running Microsoft and Linux operating system software. However, competition in these new markets is likely to intensify in coming years, and the company's ability to succeed will depend on its ability to compete effectively against enterprise server competitors with more substantial resources and its ability to achieve market acceptance of the ES7000 technology by clients, systems integrators and independent software vendors.

A number of the company's long-term contracts for infrastructure services, outsourcing, help desk and similar services do not provide for minimum transaction volumes. As a result, revenue levels are not guaranteed. In addition, some of these contracts may permit customer termination or may impose other penalties if the company does not meet the performance levels specified in the contracts.

Some of the company's systems integration contracts are fixed-price contracts under which the company assumes the risk for delivery of the contracted services and products at an agreed-upon fixed price. At times the company has experienced problems in performing some of these fixed-price contracts on a profitable basis and has provided periodically for adjustments to the estimated cost to complete them. Future results will depend on the company's ability to perform these services contracts profitably.

The company frequently enters into contracts with governmental entities. Risks and uncertainties associated with these government contracts include the availability of appropriated funds and contractual provisions that allow governmental entities to terminate agreements at their discretion before the end of their terms.

The success of the company's business is dependent on strong, long-term client relationships and on its reputation for responsiveness and quality. As a result, if a client is not satisfied with the company's services or products, its reputation could be damaged and its business adversely affected. In addition, if

the company fails to meet its contractual obligations, it could be subject to legal liability, which could adversely affect its business, operating results and financial condition.

The company has commercial relationships with suppliers, channel partners and other parties that have complementary products, services or skills. Future results will depend, in part, on the performance and capabilities of these third parties, on the ability of external suppliers to deliver components at reasonable prices and in a timely manner, and on the financial condition of, and the company's relationship with, distributors and other indirect channel partners.

More than half of the company's total revenue derives from international operations. The risks of doing business internationally include foreign currency exchange rate fluctuations, changes in political or economic conditions, trade protection measures, import or export licensing requirements, multiple and possibly overlapping and conflicting tax laws, new tax legislation, and weaker intellectual property protections in some jurisdictions.

The company cannot be sure that its services and products do not infringe on the intellectual property rights of third parties, and it may have infringement claims asserted against it or against its clients. These claims could cost the company money, prevent it from offering some services or products, or damage its reputation.

Item 4. Controls and Procedures

The Company's management, with the participation of the Company's Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the Company's disclosure controls and procedures as of March 31, 2005. Based on this evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures are effective for gathering, analyzing and disclosing the information the Company is required to disclose in the reports it files under the Securities Exchange Act of 1934, within the time periods specified in the SEC's rules and forms. Such evaluation did not identify any change in the Company's internal controls over financial reporting that occurred during the quarter ended March 31, 2005 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

EXHIBIT INDEX

Exhibit Number -----	Description -----
3.1	Restated Certificate of Incorporation of Unisys Corporation (incorporated by reference to Exhibit 3.1 to the registrant's Quarterly Report on Form 10-Q for the quarterly period ended September 30, 1999)
3.2	Bylaws of Unisys Corporation, as amended through April 22, 2004 (incorporated by reference to Exhibit 3 to the registrant's Quarterly Report on Form 10-Q for the quarterly period ended March 31, 2004)
10.1	Unisys Corporation Supplemental Executive Retirement Income Plan, as amended and restated effective January 1, 2005 (incorporated by reference to Exhibit 10.17 to the registrant's Annual Report on Form 10-K for the year ended December 31, 2004)
10.2	Unisys Corporation Elected Officer Pension Plan, as amended and restated effective January 1, 2005 (incorporated by reference to Exhibit 10.18 to the registrant's Annual Report on Form 10-K for the year ended December 31, 2004)
10.3	2005 Deferred Compensation Plan for Directors of Unisys Corporation (incorporated by reference to Exhibit 10.19 to the registrant's Annual Report on Form 10-K for the year ended December 31, 2004)
10.4	Unisys Corporation 2005 Deferred Compensation Plan (incorporated by reference to Exhibit 10.20 to the registrant's Annual Report on Form 10-K for the year ended December 31, 2004)
10.5	Consulting Agreement, dated as of March 31, 2005, between Unisys Corporation and George R. Gazerwitz (incorporated by reference to Exhibit 10 to the registrant's Current Report on Form 8-K dated March 31, 2005)
12	Statement of Computation of Ratio of Earnings to Fixed Charges
31.1	Certification of Joseph W. McGrath required by Rule 13a-14(a) or Rule 15d-14(a)
31.2	Certification of Janet Brutschea Haugen required by Rule 13a-14(a) or Rule 15d-14(a)
32.1	Certification of Joseph W. McGrath required by Rule 13a-14(b) or Rule 15d-14(b) and Section 906 of the Sarbanes-Oxley Act of 2002, 18 U.S.C. Section 1350
32.2	Certification of Janet Brutschea Haugen required by Rule 13a-14(b) or Rule 15d-14(b) and Section 906 of the Sarbanes-Oxley Act of 2002, 18 U.S.C. Section 1350

UNISYS CORPORATION
 COMPUTATION OF RATIO OF EARNINGS TO FIXED CHARGES (UNAUDITED)
 (\$ in millions)

	Three Months Ended	Years Ended December 31				
	Mar. 31, 2005	2004	2003	2002	2001	2000
Fixed charges						
Interest expense	\$ 12.6	\$ 69.0	\$ 69.6	\$ 66.5	\$ 70.0	\$ 79.8
Interest capitalized during the period	5.9	16.3	14.5	13.9	11.8	11.4
Amortization of debt issuance expenses	.8	3.5	3.8	2.6	2.7	3.2
Portion of rental expense representative of interest	15.4	61.6	55.2	53.0	53.9	42.2
Total Fixed Charges	34.7	150.4	143.1	136.0	138.4	136.6
Earnings						
Income (loss) from continuing operations before income taxes	(78.3)	(76.0)	380.5	332.8	(73.0)	348.5
Add (deduct) the following:						
Share of loss (income) of associated companies	4.3	(14.0)	(16.2)	14.2	(8.6)	(20.5)
Amortization of capitalized interest	3.1	11.7	10.2	8.8	5.4	2.2
Subtotal	(70.9)	(78.3)	374.5	355.8	(76.2)	330.2
Fixed charges per above	34.7	150.4	143.1	136.0	138.4	136.6
Less interest capitalized during the period	(5.9)	(16.3)	(14.5)	(13.9)	(11.8)	(11.4)
Total earnings (loss)	\$(42.1)	\$ 55.8	\$503.1	\$477.9	\$ 50.4	\$455.4
Ratio of earnings to fixed charges	*	*	3.52	3.51	*	3.33

* Earnings for the three months ended March 31, 2005 and for the years ended December 31, 2004 and 2001 were inadequate to cover fixed charges by \$76.8 million, \$94.6 million and \$88.0 million, respectively.

CERTIFICATION

I, Joseph W. McGrath, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Unisys Corporation;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal controls over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting;
and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
