SPECIALIZED DISCLOSURE REPORT

UNISYS CORPORATION

(Exact Name of Registrant as Specified in its Charter)

Delaware	1-8729	38-0387840
(State or Other Jurisdiction of Incorporation)	(Commission File Number)	(IRS Employer Identification No.)

801 Lakeview Drive, Suite 100  
Blue Bell, Pennsylvania 19422

(Address of Principal Executive Offices) (Zip Code)

Gerald P. Kenney: (215) 986-4205

(Name and telephone number, including area code, of the person to contact in connection with this report)

Check the appropriate box to indicate the rule pursuant to which this form is being filed, and provide the period to which the information in this form applies:

Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1 to December 31, 2014.

SECTION 1 - CONFLICT MINERALS DISCLOSURE

ITEM 1.01 CONFLICT MINERALS DISCLOSURE AND REPORT

(a) Unisys Corporation (the "Company") has determined that tantalum, tin, tungsten and gold, collectively "Conflict Minerals", are necessary to the functionality or production of its products. In 2014 the Company contracted for the manufacture of products containing Conflict Minerals, but did not directly manufacture products containing Conflict Minerals.

(b) The Company conducted a reasonable country of origin inquiry regarding Conflict Minerals utilized in its products during 2014. That reasonable country of origin inquiry was designed to determine whether those Conflict Minerals present in the Company's products originated in the Democratic Republic of the Congo or an adjoining country (collectively, the "DRC") or arose from recycled or scrap sources. That reasonable country of origin inquiry revealed that the Company's Conflict Minerals did not likely arise from recycled or scrap sources, but may have originated in the DRC.

(c) The Company exercised due diligence regarding the source and chain of custody of its Conflict Minerals through utilization of a nationally recognized due diligence framework, as more particularly described in the Company's Conflict Minerals Report filed as Exhibit 1.01. The Company is unable, after exercising due diligence, to determine whether its products contain Conflict Minerals that directly or indirectly finance or benefit armed groups in the DRC. As such, the Company's products produced in calendar year 2014 are "DRC Conflict

Undeterminable" for purposes of this report.

ITEM 1.02 EXHIBIT

The Company's Conflict Minerals report is filed as Exhibit 1.01 and is also available at the Company's website at [www.unisys.com](http://www.unisys.com) under "About Unisys" in "Social Responsibility - Conflict Minerals".

SECTION 2 - EXHIBITS

Exhibit 1.01 - Conflict Minerals Report as required by Items 1.01 and 1.02 of this Form.

SIGNATURE

-----

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.

UNISYS CORPORATION

Date: June 1, 2015

General Counsel and  
Secretary

UNISYS CORPORATION  
CONFLICT MINERALS REPORT  
REPORTING YEAR: 2014

## COMPANY OVERVIEW

Unisys Corporation ("Unisys") is a global information technology ("IT") company. Unisys provides a portfolio of IT services, software, and technology. Unisys operates in two business segments -- Services and Technology. In its Technology segment, Unisys designs and develops servers, software and related products.

Unisys has determined that certain of its products were likely to contain conflict minerals in 2014, as that term is defined by Rule 13p-1 under the Securities Exchange Act, due to the anticipated presence of such minerals in parts obtained from suppliers, either contract manufacturers or original equipment manufacturers ("OEM"), or from utilization of conflict minerals in manufacturing processes employed by Unisys suppliers. Supplier parts obtained by Unisys are utilized in the assembly of Unisys enterprise servers and other electronic equipment. Unisys is not a vertically integrated manufacturer and instead focuses on systems integration through the purchase of higher level assemblies and OEM products. Unisys is therefore several levels removed from the actual mining of conflict minerals. Unisys does not make purchases of raw ore or unrefined conflict minerals and makes no purchases in the Democratic Republic of the Congo or an adjoining country (collectively, the "DRC"). Unisys has a Conflict Minerals Policy that is available on its website at [www.unisys.com](http://www.unisys.com) under "About Unisys" in "Social Responsibility -- Conflict Minerals."

## REASONABLE COUNTRY OF ORIGIN INQUIRY

Unisys conducted a reasonable country of origin inquiry ("RCOI") to determine which parts utilized by Unisys during 2014 contained conflict minerals and whether such conflict minerals originated in the DRC. Unisys contacted each of its suppliers and asked them to provide information on (1) the conflict minerals contained in each of the parts supplied by that supplier and (2) the source of the conflict minerals, including smelter/refinery information and location of mines. Each supplier was asked to complete the Conflict Minerals Reporting Template (the "Reporting Template") developed by the Electronic Industry Citizenship Coalition Global e-Sustainability Initiative (the "EICC-GeSI"). Of the 32 suppliers identified as supplying Unisys with product that may contain conflict minerals in 2014, 25 suppliers responded with conflict minerals data. Based on those responses, Unisys determined that conflict minerals present in certain of its products, as well as conflict minerals utilized in the production of certain supplier parts, may have originated in the DRC and were not from scrap or recycled sources. Therefore, in accordance with Rule 13p-1 under the Securities Exchange Act, Unisys proceeded to engage in due diligence regarding the sources and chain of custody of its conflict minerals.

## DUE DILIGENCE - STANDARD UTILIZED

Unisys designed its due diligence framework to conform in all material respects with the framework provided by The Organization for Economic Co-operation and Development Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas, an internationally-recognized due diligence framework.

## DUE DILIGENCE - PROCESS

The Unisys due diligence process included:

1. Requesting that each supplier of parts potentially containing conflict minerals complete and return to Unisys the Reporting Template. The Reporting Template provided a standardized method for Unisys use in the collection of representations, statements and data from Unisys suppliers relative to the presence, use, source and chain of custody of conflict minerals in supplier parts that are incorporated in Unisys products for sale to end-use customers.

2. Requesting that each supplier of parts potentially containing conflict minerals identify on the Reporting Template those smelters that it uses to process parts provided to Unisys by making reference to the EICC-GeSI's Smelter Reference List, which is a compilation of names and locations of known smelters and refiners, provided by Unisys.
3. Comparing the smelters identified in the responses by suppliers who completed the Reporting Template against the list of smelter facilities that have been identified as "conflict free" by the EICC-GeSI's Conflict-Free Sourcing Initiative ("CFSI"). CFSI is a voluntary program whereby an independent third party evaluates smelter procurement activities to determine whether a smelter has sufficiently demonstrated that all materials processed by that smelter originated from sources that do not directly or indirectly finance or benefit armed groups in the DRC.

Each supplier response on the Reporting Template was evaluated and, where possible, validated to determine sufficiency, accuracy or completeness of its response. For each supplier response, Unisys subsequently assessed whether the conflict minerals identified, or those conflict minerals that may not have been identified, were consistent with the nature and characteristics of the supplied part. For each supplier response that was insufficient, potentially inaccurate or incomplete, Unisys contacted that supplier for follow up, sometimes contacting certain suppliers on multiple occasions. When a supplier's response on the Reporting Template stated that conflict minerals were sourced from the DRC and identified the smelter involved, Unisys endeavored to verify whether the smelter referenced by the supplier was identified on the CFSI list. If a supplier stated that conflict minerals in its product were not sourced from the DRC, but did not substantiate that information, Unisys proceeded to verify that supplier response. Typically, verification involved a more detailed review of the supplier's smelter response and, where possible, discussion with the supplier. If a supplier's response could not be validated through details provided to Unisys with regard to the smelter and/or smelters involved, then Unisys engaged in its own internet searches in order to attempt to verify the status of such identified smelters. If Unisys independent research could not determine the status of a smelter, then the supplier response in question was determined to be uncertain or unknown relative to the question of sourcing of raw material and was reflected as such in its Reporting Template Summary.

#### DUE DILIGENCE - RESULTS

As of March 10, 2015, of the 255 smelters identified in responses on the Reporting Template submitted to Unisys by its suppliers, 132 smelters were CFSI compliant, 30 smelters were active in the process of obtaining CFSI compliance, and 93 smelters were not identified as participating in the CFSI smelter verification process.

Unisys RCOI and due diligence processes reveal that there is no evidence of conflict minerals sourcing from the DRC for 230 of the 255 smelters that may be associated with conflict minerals utilized in Unisys products or in third party manufacturing processes utilized to manufacture Unisys products. Of the remaining 25 smelters for which there is evidence that conflict minerals may have been sourced from the DRC, 22 of those smelters are CFSI compliant. Unisys RCOI and due diligence processes have identified 3 smelters that were not participating in the CFSI smelter verification process as of March 10, 2015 that may have sourced conflict minerals from the DRC that were used in Unisys products in 2014.

Although Unisys due diligence efforts determined that 252 of 255 smelters that may be associated with Unisys products during 2014 were not sourcing conflict minerals from the DRC or were not supporting armed conflict in the DRC, Unisys is unable to precisely determine the status of 3 of those smelters. As such, Unisys due diligence found that Unisys products containing or utilizing conflict minerals during 2014 are DRC conflict undeterminable for purposes of Rule 13p-1 under the Securities Exchange Act.

#### RISK MITIGATION - IMPROVEMENT PROGRAM

The steps that Unisys will take in reporting year 2015 to mitigate the risk that Unisys conflict minerals benefit or finance armed groups are as

follows:

1. Unisys will continue to work with suppliers who provided incomplete or insufficient information in an effort to obtain complete and accurate information in 2015;
2. Unisys will again request information and supporting data from each supplier providing parts to Unisys that are subject to 2015 reporting requirements by utilizing the Reporting Template and will pursue a completed template response that identifies material down to the smelter and mine;
3. Unisys will again follow its due diligence process to review and validate supplier responses that are obtained in support of Unisys 2015 conflict minerals reporting;
4. Unisys will continue to provide its Conflict Minerals Policy to suppliers as part of its Reporting Template-based supplier inquiry process for 2015; and
5. Unisys includes in its purchase order standard terms and conditions a clause requiring suppliers to disclose to Unisys the existence and origin of any conflict minerals in any products supplied to Unisys and is adding a similar clause to its agreement templates for incorporation into new agreements. Unisys agreements will continue to be reviewed as they approach renewal, and a similar clause will be added as appropriate.

#### PRODUCT DESCRIPTION AND LIST OF FACILITIES

A list of parts used in Unisys enterprise servers and other electronic equipment for which Unisys solicited supplier information regarding conflict mineral content or conflict mineral use in production is attached as Exhibit A. A list of facilities that, to the extent known, processed the necessary conflict minerals in Unisys products is attached as Exhibit B.

#### CONFLICT MINERALS REPORT EXHIBIT A

##### DESCRIPTION OF UNISYS CORPORATION'S 2014 PRODUCTS (PARTS/SUPPLIES)

#### PRODUCT DESCRIPTION

Cables & Harnesses  
Computer Cabinets & Accessories  
Computer Products - Servers, Storage, Input/Output & other Peripherals  
Displays / Monitors  
Fasteners  
Flex Circuits  
Keyboards  
Labels  
Memory - Modules, Universal Serial Port (USB) Devices, Flash Cards  
Molded Plastic Parts  
Network Switches  
Power Strips  
Power Supplies  
Printed Circuit Assemblies  
Sheet Metal & Electro-mechanical Assemblies  
Solder  
Thermal Transfer Products  
  
Universal Serial Port (USB) Security Devices

#### CONFLICT MINERALS REPORT EXHIBIT B
