UNISYS CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

In the opinion of management, the financial information furnished herein reflects all adjustments necessary for a fair presentation of the financial position, results of operations and cash flows for the interim periods specified. These adjustments consist only of normal recurring accruals except as disclosed herein. Because of seasonal and other factors, results for interim periods are not necessarily indicative of the results to be expected for the full year.

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions about future events. These estimates and assumptions affect the amounts of assets and liabilities reported, disclosures about contingent assets and liabilities and the reported amounts of revenue and expenses. Such estimates include the valuation of accounts receivable, inventories, outsourcing assets, marketable software, goodwill and other long-lived assets, legal contingencies, indemnifications, and assumptions used in the calculation for systems integration projects, income taxes and retirement and other post-employment benefits, among others. These estimates and assumptions are based on management's best estimates and judgment. Management evaluates its estimates and assumptions on an ongoing basis using historical experience and other factors, including the current economic environment, which management believes to be reasonable under the circumstances. Management adjusts such estimates and assumptions when facts and circumstances dictate. As future events and their effects cannot be determined with precision, actual results could differ significantly from these estimates. Changes in those estimates resulting from continuing changes in the economic environment will be reflected in the financial statements in future periods.

The company's accounting policies are set forth in detail in note (1) of the notes to the consolidated financial statements in the company's Annual Report on Form 10-K for the year ended December 31, 2009 filed with the Securities and Exchange Commission. Such Annual Report also contains a discussion of the company's critical accounting policies. The company believes that these critical accounting policies affect its more significant estimates and judgments used in the preparation of the company's consolidated financial statements. There have been no changes in the company's critical accounting policies from those disclosed in the company's Annual Report on Form 10-K for the year ended December 31, 2009.

a. On April 30, 2010, the company completed the sale of its health information management (HIM) business, and on August 31, 2010, the company completed the sale of its UK-based Unisys Insurance Services Limited (UISL) business, which provides business process outsourcing (BPO) services to the UK life and pensions industry. In connection with the sale of UISL, the company has payment obligations of approximately \$24 million over the next five quarterly periods.

The company's financial statements have been retroactively reclassified to report these businesses as discontinued operations. As a result, all items relating to these businesses within the consolidated statements of income have been reported as income from discontinued operations, net of tax, and all items relating to these businesses within the consolidated balance sheets have been reported as either assets or liabilities of discontinued operations.

The results of the HIM business discontinued operations for the three and nine months ended September 30, 2010 and 2009 are as follows (in millions of dollars):

	Three Months Ended September 30		Nine Months Ended September 30	
	2010	2009	2010*	2009
Revenue	\$ —	\$ 28.7	\$ 42.0	\$ 83.4

* Includes results of operations through the April 30, 2010 closing date.

UNISYS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)—(Continued)

Pursuant to the indentures governing the company's secured notes maturing in 2014 and 2015, net proceeds from the sale of the HIM business are restricted and may be used only for certain purposes, including to purchase long-term assets that would constitute collateral; to make capital expenditures with respect to assets that constitute collateral; to repay certain of the company's outstanding debt obligations; or to acquire other assets that are used or useful in its business and that would constitute collateral. At September 30, 2010, \$10.9 million remained restricted. This amount is reported in prepaid expenses and other current assets in the company's consolidated balance sheet.

The results of the UISL business discontinued operations for the three and nine months ended September 30, 2010 and 2009 are as follows (in millions of dollars):

	Three Months Ended September 30		Nine Months Ended September 30	
	2010*	2009	2010*	2009

Income tax provision (benefit)	(4.5)	(2.2)	4.0	3.5
Income from discontinued operations, net of tax	\$ 6.5	\$ 8.7	\$ 73.2	\$ 16.3

On February 1, 2010, the company closed on the sale of its U.S. specialized technology check sorter equipment and related U.S. maintenance business. At December 31, 2009, the assets and liabilities of the business sold were reported as held for sale in the company's consolidated balance sheet as follows: approximately \$24 million in "prepaid expenses and other current assets" and approximately \$20 million in "other accrued liabilities." These amounts had been reflected at fair value, less cost to sell, and as a result, the company reported an impairment of \$13.4 million in 2009 in the company's consolidated statement of income. In the nine months ended September 30, 2010, the company recorded a loss on the sale of approximately \$3.3 million, principally as a result of closing date working capital and other adjustments. The divested business, which had operations in both of the company's reporting segments of Services and Technology, generated 2009 revenue and pretax loss of approximately \$100 million and \$3 million, respectively.

b. Due to cumulative inflation of approximately 100 percent or more over the last 3-year period, the company's Venezuelan subsidiary has applied highly inflationary accounting beginning January 1, 2010. For those international subsidiaries operating in highly inflationary economies, the U.S. dollar is the functional currency, and as such, nonmonetary assets and liabilities are translated at historical exchange rates, and monetary assets and liabilities are translated at current exchange rates. Exchange gains and losses arising from translation are included in other income (expense), net. Effective January 11,

UNISYS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)—(Continued)

2010, the Venezuelan government devalued the Bolivar Fuerte by 50 percent by resetting the official exchange rate from 2.15 to the U.S. dollar to 4.30 to the U.S. dollar. As a result, the company recorded a foreign exchange loss in the first quarter of 2010 of approximately \$20 million. The company has used and continues to use the official exchange rate for translation purposes. At September 30, 2010, the company's operations in Venezuela had net monetary assets denominated in local currency of approximately \$20 million.

c. The following table shows how earnings per share attributable to Unisys Corporation was computed for the three and nine months ended September 30, 2010 and 2009 (dollars in millions, shares in thousands):

	Three Months Ended September 30		Nine Months Ended September 30	
	2010	2009	2010	2009

The company currently expects to make cash contributions of approximately \$115 million to its worldwide defined benefit pension plans in 2010 compared with \$94.0 million in 2009. For the nine months ended September 30, 2010 and 2009, \$61.0 million and \$55.8 million, respectively, of cash contributions have been made. In accordance with regulations governing contributions to U.S. defined benefit pension plans, the company is not required to fund its U.S. qualified defined benefit pension plan in 2010.

Net periodic postretirement benefit expense for the three and nine months ended September 30, 2010 and 2009 is presented below (in millions of dollars):

	Three Months Ended Sept. 30		Nine Months Ended Sept. 30	
	2010	2009	2010	2009
Service cost	\$—	\$—	\$.1	\$.2
Interest cost	2.7	3.0	8.0	8.9
Expected return on assets	(.1)	(.1)	(.4)	(.3)
Amortization of prior service cost	.4	.4	1.1	1.1
Recognized net actuarial loss	.9	.9	2.8	2.6
Net periodic postretirement benefit expense	<u>\$ 3.9</u>	<u>\$ 4.2</u>	<u>\$ 11.6</u>	<u>\$ 12.5</u>

The company expects to make cash contributions of approximately \$24 million to its postretirement benefit plan in 2010 compared with \$22.7 million in 2009. For the nine months ended September 30, 2010 and 2009, \$14.8 million and \$16.2 million, respectively, of cash contributions have been made.

e. Due to its foreign operations, the company is exposed to the effects of foreign currency exchange rate fluctuations on the U.S. dollar, principally related to intercompany account balances. The company uses derivative financial instruments to reduce its exposure to market risks from changes in foreign currency exchange rates on such balances. The company enters into foreign exchange forward contracts, generally having maturities of one month, which have not been designated as hedging instruments. At September 30, 2010 and 2009, the notional amount of these contracts was \$36.0 million and \$36.7 million, respectively. At September 30, 2010 and 2009, the fair value of such contracts was a net gain of \$.7 million and a net loss of \$.3 million, respectively, of which \$8.1 million and \$5.4 million, respectively, has been recognized in "Prepaid expenses and other current assets" and \$7.4 million and \$5.7 million, respectively, has been recognized in "Other accrued liabilities" in the company's consolidated balance sheet. For the nine months ended September 30, 2010 and 2009, changes in the fair value of these instruments were a gain of \$.6 million and a loss of \$.5 million, respectively, which has been recognized in earnings in "Other income (expense), net" in the company's consolidated statement of income. The fair value of these forward contracts is based on quoted prices for similar but not identical financial instruments; as such, the inputs are considered Level 2 inputs.

Financial assets with carrying values approximating fair value include cash and cash equivalents and accounts receivable. Financial liabilities with carrying values approximating fair value include accounts payable and other accrued liabilities. The carrying amounts of these financial assets and liabilities approximate fair value due to their short maturities. At September 30, 2010 and December 31, 2009, the carrying amount of long-term debt was less than fair

UNISYS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)—(Continued)

value, which is based on market prices (Level 2 inputs), of such debt by approximately \$140 million and \$100 million, respectively.

f. Under stockholder approved stock-based plans, stock options, stock appreciation rights, restricted stock and restricted stock units may be granted to officers, directors and other key employees. At September 30, 2010, 5.2 million shares of unissued common stock of the company were available for granting under these plans.

The fair value of stock option awards was estimated using the Black-Scholes option pricing model with the following assumptions and weighted-average fair values:

	Nine Months Ended Sept. 30,	
	2010	2009
Weighted-average fair value of grant	\$ 17.87	\$ 2.81
Risk-free interest rate	1.74%	1.57%
Expected volatility	72.20%	58.28%
Expected life of options in years	3.63	3.77
Expected dividend yield	—	—

Restricted stock unit awards may contain time-based units, performance-based units or a combination of both. Each performance-based unit will vest into zero to 1.5 shares depending on the degree to which the performance goals are met. Compensation expense resulting from these awards is recognized as expense ratably for each installment from the date of grant until the date the restrictions lapse and is based on the fair market value at the date of grant and the probability of achievement of the specific performance-related goals.

The company records all share-based expense in selling, general and administrative expense.

During the nine months ended September 30, 2010 and 2009, the company recorded \$7.3 million of share-based compensation expense and \$.3 million of share-based compensation income, respectively, which is comprised of \$2.7 million restricted stock unit expense and \$2.0 million of restricted stock unit income and \$4.6 million and \$1.7 million of stock option expense, respectively. During the three months ended September 30, 2009, the company reversed \$2.4 million of previously-accrued compensation expense related to performance-based restricted stock units due to a change in the assessment of the achievability of the performance goals. In addition, during the three months ended September 30, 2009, the company reversed \$2.6 million of previously-accrued share-based compensation principally related to employees terminated in prior periods.

A summary of stock option activity for the nine months ended September 30, 2010 follows (shares in thousands):

Options	Shares	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Term (years)	Aggregate Intrinsic Value (\$ in millions)
Outstanding at December 31, 2009	3,981	\$ 109.30		
Granted	618	34.71		
Exercised	(197)	6.48		
Forfeited and expired	(1,006)	171.33		
Outstanding at Sept. 30, 2010	3,396	83.70	2.29	\$ 18.5
Expected to vest at Sept. 30, 2010	1,075	21.93	3.85	10.3
Exercisable at Sept. 30, 2010	2,283	113.85	1.54	7.8

The aggregate intrinsic value represents the total pretax value of the difference between the company's closing stock price on the last trading day of the period and the exercise price of the options, multiplied by the number of in-the-money stock options that would have been received by the option holders had all option holders exercised their options on September 30, 2010. The intrinsic value of the company's stock options changes based on the closing price of the company's stock. The total intrinsic value of options exercised for

UNISYS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)—(Continued)

the nine months ended September 30, 2010 and 2009 was \$5.5 million and zero, respectively. As of September 30, 2010, \$7.2 million of total unrecognized compensation cost related to stock options is expected to be recognized over a weighted-average period of 2.2 years.

A summary of restricted stock unit activity for the nine months ended September 30, 2010 follows (shares in thousands):

	Restricted Stock Units	Weighted- Average Grant Date Fair Value
Outstanding at December 31, 2009	561	\$ 40.42
Granted	219	34.74
Vested	(151)	26.42
Forfeited and expired	(214)	64.71
Outstanding at Sept. 30, 2010	<u>415</u>	<u>28.86</u>

The fair value of restricted stock units is determined based on the trading price of the company's common shares on the date of grant. The aggregate weighted-average grant-date fair value of restricted stock units granted during the nine months ended September 30, 2010 and 2009 was \$7.6 million and \$1.1 million, respectively. As of September 30, 2010, there was \$4.9 million of total unrecognized compensation cost related to outstanding restricted stock units granted under the company's plans. That cost is expected to be recognized over a weighted-average period of 2.0 years. The aggregate weighted-average grant-date fair value of restricted share units vested during the nine months ended September 30, 2010 and 2009 was \$4.0 million and \$3.0 million, respectively.

Common stock issued upon exercise of stock options or upon lapse of restrictions on restricted stock units is newly issued shares. Cash received from the exercise of stock options for the nine months ended September 30, 2010 and 2009 was \$1.3 million and zero, respectively. The company is currently not recognizing any tax benefits from the exercise of stock options or upon issuance of stock upon lapse of restrictions on restricted stock units in light of its tax position. Tax benefits resulting from tax deductions in excess of the compensation costs recognized are classified as financing cash flows.

g. The company has two business segments: Services and Technology. Revenue classifications by segment are as follows: Services—systems integration and consulting, outsourcing, infrastructure services and core maintenance; Technology—enterprise-class servers and other technology.

The accounting policies of each business segment are the same as those followed by the company as a whole. Intersegment sales and transfers are priced as if the sales or transfers were to third parties. Accordingly, the Technology segment recognizes intersegment revenue and manufacturing profit on hardware and software shipments to customers under Services contracts. The Services segment, in turn, recognizes customer revenue and marketing profits on such shipments of company hardware and software to customers. The Services segment also includes the sale of hardware and software products sourced from third parties that are sold to customers through the company's Services channels. In the company's consolidated statements of income, the manufacturing costs of products sourced from the Technology segment and sold to Services customers are reported in cost of revenue for Services.

Also included in the Technology segment's sales and operating profit are sales of hardware and software sold to the Services segment for internal use in Services engagements. The amount of such profit included in operating income of the Technology segment for the three months ended September 30, 2010 and 2009 was \$4.9 million and \$1.5 million, respectively. The amount for the nine months ended September 30, 2010 and 2009 was \$5.4 million and \$12.0 million, respectively. The profit on these transactions is eliminated in Corporate.

The company evaluates business segment performance on operating income exclusive of restructuring charges and unusual and nonrecurring items, which are included in Corporate. All other corporate and centrally incurred costs are allocated to the business segments based principally on revenue, employees, square footage or usage.

Balance at Sept. 30, 2010	<u>\$.8</u>

i. Cash paid during the nine months ended September 30, 2010 and 2009 for income taxes was \$32.6 million and \$45.4 million, respectively.

Cash paid during the nine months ended September, 2010 and 2009 for interest was \$84.5 million and \$83.5 million, respectively.

j. Effective January 1, 2010, the company adopted a Financial Accounting Standards Board (FASB) accounting standard which among other changes, eliminates the concept of a “qualifying special-purpose entity,” changes the requirements for derecognizing financial assets, defines the term participating interest to establish specific conditions for reporting a transfer of a portion of a financial asset as a sale and requires additional disclosures. The recognition and measurement provisions are effective for transfers occurring on or after January 1, 2010. The company concluded that sales of participating interest in accounts receivable under its U.S. accounts receivable securitization facility no longer meet the requirements to be accounted for as sales due to the change in the definition of a participating interest, whereby all cash flows received from the entire financial asset must be divided proportionally among the participating interest holders in an amount equal to their share of ownership. Since in the company’s U.S. accounts receivable securitization facility, the company’s retained interest is subordinated to the other holders, the transaction does not meet the definition of the sale of a participating interest, and therefore will be accounted for as a secured borrowing. See note (m).

In October 2009, the FASB issued two accounting standards. The first standard supersedes certain prior accounting guidance and requires an entity to allocate arrangement consideration at the inception of an arrangement to all of its deliverables based on their relative selling prices (i.e., the relative-selling-price method). The standard eliminates the use of the residual method of allocation and requires the relative-selling-price method in all circumstances in which an entity recognizes revenue for an arrangement with multiple deliverables subject to this standard. The second standard amends prior software revenue recognition accounting guidance by excluding from the scope of such prior guidance tangible products that contain both software elements and non-software elements that function together to deliver the tangible product’s essential functionality. Both of these standards must be adopted at the same time and both will be effective prospectively for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010, which for the company is January 1, 2011. Early adoption is permitted. If an entity elects early adoption and the period of adoption is not the beginning of the entity’s fiscal year, the entity is required to apply the amendments retrospectively from the beginning of the entity’s fiscal year. An entity may elect, but is not required, to adopt these amendments retrospectively to prior periods. The company is currently assessing when it will adopt these standards and is evaluating the impact of the adoption on its consolidated results of operations and financial position; however, the company expects, as indicated in the standards, that the application of the amended guidance will result in

UNISYS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)—(Continued)

revenue being recognized earlier than had been required under the prior guidance.

k. There are various lawsuits, claims, investigations and proceedings that have been brought or asserted against the company, which arise in the ordinary course of business, including actions with respect to commercial and government contracts, labor and employment, employee benefits, environmental matters and intellectual property. The company records a provision for these matters when it is both probable that a liability has been incurred and the amount of the loss can be reasonably estimated. Any provisions are reviewed at least quarterly and are adjusted to reflect the impact and status of settlements, rulings, advice of counsel and other information and events pertinent to a particular matter.

The company believes that it has valid defenses with respect to legal matters pending against it. Based on its experience, the company also believes that the damage amounts claimed in the lawsuits disclosed below are not a meaningful indicator of the company's potential liability. Litigation is inherently unpredictable, however, and it is possible that the company's results of operations or cash flow could be affected in any particular period by the resolution of one or more of the legal matters pending against it.

In 2002, the company and the Transportation Security Administration (TSA) entered into a competitively awarded contract providing for the establishment of secure information technology environments in airports. The Civil Division of the Department of Justice, working with the Inspector General's Office of the Department of Homeland Security, is reviewing issues relating to labor categorization and overtime on the TSA contract. The Civil Division is also reviewing issues relating to cyber intrusion protection under the TSA and follow-on contracts. The company is working cooperatively with the Civil Division. The company does not know whether the Civil Division will pursue these matters, or, if pursued, what effect they might have on the company.

The company has contracts with the General Services Administration (GSA), known as Multiple Award Schedule Contracts, under which various U.S. governmental agencies can purchase products and services from the company. Auditors from the GSA's Office of Inspector General have been reviewing the company's compliance with the disclosure and pricing provisions under two of these contracts, and whether the company has potentially overcharged the government under the contracts. Separately, the company has made voluntary disclosures about these matters to the responsible GSA contracting officers. The company has been providing pricing and other information to the GSA auditors and is working cooperatively with them. One of these matters is now completed, with the company paying a de minimis amount to the GSA. The audit on the other contract is in its preliminary stages, and the company cannot predict the outcome at this time.

In April 2007, the Ministry of Justice of Belgium sued Unisys Belgium SA-NV, a Unisys subsidiary (Unisys Belgium), in the Court of First Instance of Brussels. The Belgian government had engaged the company to design and develop software for a computerized system to be used to manage the Belgian court system. The Belgian State terminated the contract and in its lawsuit has alleged that the termination was justified because Unisys Belgium failed to deliver satisfactory software in a timely manner. It claims damages of approximately 28 million Euros. Unisys Belgium has filed its defense and counterclaim in the amount of approximately 18.5 million Euros. The company believes it has valid defenses to the claims and contends that the Belgian State's termination of the contract was unjustified.

In December 2007, Lufthansa AG sued Unisys Deutschland GmbH, a Unisys subsidiary (Unisys Germany), in the District Court of Frankfurt, Germany, for allegedly failing to perform properly its obligations during the initial phase of a 2004 software design and development contract relating to a Lufthansa customer loyalty program. Under the contract, either party was free to withdraw from the project at the conclusion of the initial design phase. Rather than withdraw, Lufthansa instead terminated the contract and failed to pay the balance owed to Unisys Germany for the initial phase. Lufthansa's lawsuit alleges that Unisys Germany breached the contract by failing to deliver a proper design for the new system and seeks approximately 21.4 million Euros in damages. The company believes it has valid defenses and has filed its defense and a counterclaim in the amount of approximately 1.5 million Euros. The litigation is proceeding.

Notwithstanding that the ultimate results of the lawsuits, claims, investigations and proceedings that have been brought or asserted against the company are not currently determinable, the company believes that at September 30, 2010, it has adequate provisions for any such matters.

l. Accounting rules governing income taxes require that deferred tax assets and liabilities be recognized using enacted tax rates for the effect of temporary differences between the book and tax bases of recorded assets and liabilities. In addition, the rules require that deferred tax assets be reduced by a valuation allowance if it is more likely than not that some portion or the entire deferred tax asset will not be realized.

The company evaluates quarterly the realizability of its deferred tax assets by assessing its valuation allowance and by adjusting the amount of such allowance, if necessary. The factors used to assess the likelihood of realization are the company's forecast of future taxable income and available tax-planning strategies that could be implemented to realize the net deferred tax assets. The company uses tax-planning strategies to realize or renew net deferred tax assets to avoid the potential loss of future tax benefits.

A full valuation allowance was recognized in 2005 and is currently maintained for all U.S. and certain foreign deferred tax assets in excess of deferred tax liabilities. The company will record a tax provision or benefit for those international subsidiaries that do not have a full valuation allowance against their deferred tax assets. Any profit or loss recorded for the company's U.S. continuing operations will have no provision or benefit associated with it due to full valuation allowance, except with respect to benefits related to income from discontinued operations. As a result, the company's provision or benefit for taxes will vary significantly depending on the geographic distribution of income. Due to its full valuation allowance in the U.S., the recently enacted health care legislation will have no impact on the company's U.S. deferred tax assets.

Internal Revenue Code Sections 382 and 383 provide annual limitations with respect to the ability of a corporation to utilize its net operating loss (as well as certain built-in losses) and tax credit carryforwards, respectively (Tax Attributes), against future U.S. taxable income, if the corporation experiences an "ownership change." In general terms, an ownership change may result from transactions increasing the ownership of certain stockholders in the stock of a corporation by more than 50 percentage points over a three-year period.

The company regularly monitors ownership changes (as calculated for purposes of Section 382). Based on currently available information, the company's "ownership change" level is estimated to be in excess of 45 percentage points as of September 30, 2010.

In the event of an ownership change, utilization of the company's Tax Attributes would be subject to an annual limitation determined in part by multiplying the value of our stock at the time of the ownership change by the applicable long-term tax-exempt rate (which is 3.98% for October 2010), possibly subject to increase based on the built-in gain in the company's assets at the time of the ownership change. Any unused annual limitation may be carried over to later years. In the event of an ownership change, the company's future U.S. taxable income may not be fully offset by existing Tax Attributes, if such income exceeds the company's annual limitation, and the company may incur a tax liability with respect to such income.

m. In May 2008, the company entered into a three-year, U.S. accounts receivable securitization facility. Under this facility, the company has agreed to sell, on an ongoing basis, through Unisys Funding Corporation I, a wholly owned subsidiary, up to \$150 million of interests in eligible U.S. trade accounts receivable. Under the facility, receivables are sold at a discount that reflects, among other things, a yield based on LIBOR subject to a minimum rate. The facility includes customary representations and warranties, including no material adverse change in the company's business, assets, liabilities, operations or financial condition. It also requires the company to maintain a minimum fixed charge coverage ratio and requires the maintenance of certain ratios related to the sold receivables. Other termination events include failure to perform covenants, materially incorrect representations and warranties, change of control and default under debt aggregating at least \$25 million.

As discussed in note (j), effective January 1, 2010, the company adopted a new accounting standard whereby the company's U.S. accounts receivable securitization facility no longer meets the requirements to be treated as a sale, and therefore will be accounted for as a secured borrowing. At September 30, 2010 and December 31, 2009, receivables of zero and \$100 million, respectively, were sold. At December 31, 2009, the receivables sold under the facility of \$100 million were treated as a sale and therefore removed from the accompanying consolidated balance sheet.

n. At September 30, 2010, the company's cost-reduction liability, substantially all of which relates to idle lease cost, was approximately \$19 million.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Overview

The company reported improved operating income for the nine months ended September 30, 2010 driven by ClearPath technology sales, as well as the continuing benefits from streamlining operations and refocusing its business model. For the nine months ended September 30, 2010 operating profit rose to \$241.1 million, or 8.1% of revenue, compared with operating profit of \$195.9 million, or 6.1% of revenue, in the first nine months of 2009.

For the nine months ended September 30, 2010, the company reported net income of \$136.9 million compared with a year-ago net income of \$74.8 million. The results for the current-year period include income of \$73.2 million from discontinued operations, related primarily to the gain on the sale of the company's health information management (HIM) business, completed on April 30, 2010 and the sale of the company's UK-based Unisys Insurance Services Limited (UISL) business, which provides business process outsourcing (BPO) services to the UK life and pensions industry, completed on August 31, 2010 (see note (a) of the Notes to Consolidated Financial Statements). The company's results for the nine months ended September 30, 2010 also include approximately \$38 million of foreign exchange losses in "other income (expense), net", including approximately \$20 million relating to the January 2010 currency devaluation in Venezuela (see note (b) of the Notes to Consolidated Financial Statements). Prior-year results included approximately \$6 million of foreign exchange losses in "other income (expense), net".

Revenue for the nine months ended September 30, 2010 declined 8% to \$2.98 billion compared with \$3.23 billion in the year-ago period, as the company continues to focus on profitable businesses that build on its core areas of strength. Approximately two percentage points of the revenue decline in the period was due to the divestiture of the company's U.S. specialized technology check sorter equipment and related U.S. maintenance business. Foreign exchange rates had an approximately 2 percentage-point positive impact on revenue for the nine months ended September 30, 2010.

The company's financial statements have been retroactively reclassified to report the HIM business and the UISL business as discontinued operations. As a result, all items relating to these businesses within the consolidated statements of income have been reported as income from discontinued operations, net of tax, and all items relating to these businesses within the consolidated balance sheets have been reported as either assets or liabilities of discontinued operations.

The company has announced that effective January 1, 2011 that it will reinstate a company match to its U.S. 401(k) Savings Plan, which had been suspended effective January 1, 2009. The company will match 50 percent of the first 6 percent of eligible pay contributed to the plan on a before-tax basis (subject to IRS limits). The company expects to fund the match with the company's common stock and estimates the cost of such match will be approximately \$14 million in 2011.

Results of operations

Company results

Three months ended September 30, 2010 compared with the three months ended September 30, 2009

Revenue for the quarter ended September 30, 2010 was \$960.6 million compared with \$1,106.4 million for the third quarter of 2009, a decrease of 13% from the prior year. Approximately 2 percentage points of the decline was due to divestitures of businesses. Foreign currency fluctuations had a 1-percentage-point negative impact on revenue in the current period compared with the year-ago period. Services revenue declined 10% (2 percentage points of the decline were due to divested businesses) and Technology revenue declined 31% (1 percentage point of the decline was due to divested businesses) in the current quarter compared with the year-ago period. U.S. revenue was down 15% in the third quarter compared with the year-ago period, as declines in commercial revenue were partially offset by an increase in Federal government revenue. Approximately 4 percentage points of the decline was due to divestitures of businesses. International revenue decreased 12% in the current quarter principally due to declines in Europe and Pacific/Asia. Foreign currency had a 2-percentage-point negative impact on international revenue in the three months ended September 30, 2010 compared with the three months ended September 30, 2009.

Total gross profit margin was 24.7% in the three months ended September 30, 2010 compared with 26.9% in the three months ended September 30, 2009. The decrease in gross profit margin principally reflects lower ClearPath sales.

Selling, general and administrative expense in the three months ended September 30, 2010 was \$142.4 million (14.8% of revenue) compared with \$161.9 million (14.6% of revenue) in the year-ago period. The decrease in selling, general and administrative expense reflects the benefits derived from cost reduction actions, as well as foreign currency exchange impacts. During the three months ended September 30, 2009, the company reversed \$2.4 million of previously-accrued compensation expense related to performance-based restricted stock units due to a change in the assessment of the achievability of the performance goals. In addition, during the three months ended September 30, 2009, the company reversed \$2.6 million of previously-accrued share-based compensation principally related to employees terminated in prior periods.

Research and development (R&D) expenses in the third quarter of 2010 were \$18.9 million compared with \$24.3 million in the third quarter of 2009. The decrease in R&D expenses in 2010 compared with 2009 principally reflects changes in the company's development model as the company has focused its investments on software development versus hardware design.

For the third quarter of 2010, the company reported an operating profit of \$76.1 million compared with an operating profit of \$111.6 million in the third quarter of 2009.

For the three months ended September 30, 2010 pension income was \$.8 million compared with pension income of \$5.2 million for the three months ended September 30, 2009. The company records pension income or expense, as well as other employee-related costs such as payroll taxes and medical insurance costs, in operating income in the following income statement categories: cost of revenue; selling, general and administrative expenses; and research and development expenses. The amount allocated to each category is based on where the salaries of active employees are charged.

Interest expense for the three months ended September 30, 2010 was \$25.0 million compared with \$25.4 million for the three months ended September 30, 2009.

Other income (expense), net was an expense of \$.2 million in the third quarter of 2010, compared with expense of \$3.4 million in 2009. The decrease included foreign exchange gains of \$.5 million in the three months ended September 30, 2010 compared with a loss of \$.4 million in the three months ended September 30, 2009. Included in the prior year period was a loss of \$4.7 million on the sale of a subsidiary.

Income from continuing operations before income taxes for the three months ended September 30, 2010 was \$50.9 million compared with income of \$82.8 million in 2009. The provision for income taxes was \$28.2 million in the current quarter compared with a provision of \$28.4 million in the year-ago period. As discussed in note (l) of the Notes to Consolidated Financial Statements, the company evaluates quarterly the realizability of its deferred tax assets by assessing its valuation allowance and by adjusting the amount of such allowance, if necessary. The company will record a tax provision or benefit for those international subsidiaries that do not have a full valuation allowance against their deferred tax assets. Any profit or loss recorded for the company's U.S. continuing operations will have no provision or benefit associated with it due to its full valuation allowance, except with respect to benefits related to income from discontinued operations. As a result, the company's provision or benefit for taxes will vary significantly quarter to quarter depending on the geographic distribution of income. Due to its full valuation allowance in the U.S., the recently enacted health care legislation will have no impact on the company's U.S. deferred tax assets.

Net income from continuing operations attributable to Unisys Corporation for the three months ended September 30, 2010 was \$21.8 million, or \$.50 per diluted share, compared with \$52.4 million, or \$1.27 per share, for the three months ended September 30, 2009.

Income from discontinued operations for the three months ended September 30, 2010 was \$6.5 million, or \$.15 per diluted share, compared with \$8.7 million, or \$.21 per share, for the three months ended September 30, 2009. See note (a) of the Notes to Consolidated Financial Statements.

Nine months ended September 30, 2010 compared with the nine months ended September 30, 2009

Revenue for the nine months ended September 30, 2010 was \$2.98 billion compared with \$3.23 billion for the nine months ended September 30, 2009, a decrease of 8% from the prior year. Approximately 2 percentage points of the decline were due to divestitures of businesses. Foreign currency fluctuations had a 2-percentage-point positive impact on revenue in the current period compared with the year-ago period. Services revenue declined 9% (2 percentage points of the decline were due to divested businesses) and Technology revenue increased 2% (adjusting for divested businesses, the increase would have been 5 percentage points higher) for the nine months ended September 30, 2010 compared with the year-ago period. U.S. revenue was down 14% in the first nine months of 2010 compared with the year-ago period, driven by decreases in both Federal government and commercial revenue. Approximately 4 percentage points of the decline were due to divestitures of businesses. International revenue decreased 2% in the first nine months of 2010 due to decreases in Europe, offset in part by increases in Brazil and Pacific/Asia. Foreign currency had a 4-percentage-point positive impact on international revenue in the nine months ended September 30, 2010 compared with the nine months ended September 30, 2009.

Total gross profit margin was 25.6% in the nine months ended September 30, 2010 compared with 24.0% in the nine months ended September 30, 2009. The increase in gross profit margin principally reflects higher ClearPath sales as well as the benefits derived from cost reduction actions.

Selling, general and administrative expense in the nine months ended September 30, 2010 was \$458.7 million (15.4% of revenue) compared with \$500.2 million (15.5% of revenue) in the year-ago period. The decrease in selling, general and administrative expense reflects the benefits from cost reduction actions, offset in part by foreign currency exchange impacts. During the nine months ended September 30, 2009, the company reversed \$2.4 million of previously-accrued compensation expense related to performance-based restricted stock units due to a change in the assessment of the achievability of the performance goals. In addition, during the nine months ended September 30, 2009, the company reversed \$2.6 million of previously-accrued share-based compensation principally related to employees terminated in prior periods.

Research and development (R&D) expenses in the first nine months of 2010 were \$60.8 million compared with \$76.8 million in the first nine months of 2009. The decrease in R&D expenses in 2010 compared with 2009 principally reflects changes in the company's development model as the company has focused its investments on software development versus hardware design.

For the nine months ended September 30, 2010, the company reported operating income of \$241.1 million compared with operating income of \$195.9 million for the nine months ended September 30, 2009. During the nine months ended September 30, 2009, the company recorded a benefit of \$11.2 million relating to a change in Brazilian law involving a gross receipt tax. Of this amount \$5.4 million is reflected in other income, \$6.1 million is reflected in cost of revenue and \$3 million of expense is in selling, general and administrative expense.

For the nine months ended September 30, 2010 pension income was \$2.3 million compared with pension income of \$17.0 million for the nine months ended September 30, 2009.

Interest expense for the nine months ended September 30, 2010 was \$76.8 million compared with \$68.4 million for the nine months ended September 30, 2009.

Other income (expense), net was an expense of \$44.6 million for the nine months ended September 30, 2010, compared with expense of \$7.3 million for the nine months ended September 30, 2009. The increase in expense was principally due to foreign exchange losses of \$38.4 million in the nine months ended September 30, 2010 compared with losses of \$6.4 million in the nine months ended September 30, 2009. Included in the foreign exchange losses for the nine months ended September 30, 2010 was \$19.9 million related to the Venezuelan devaluation, see note (b) of the Notes to Consolidated Financial Statements. In addition, income of \$5.4 million was recognized in the nine months ended September 30, 2009 related to the Brazilian law change referred to above. Also included in the prior year period was a loss of \$4.7 million on the sale of a subsidiary.

The company reported income from continuing operations before income taxes for the nine months ended September 30, 2010 of \$119.7 million compared with income of \$120.2 million in 2009. The provision for income taxes was \$52.7 million for the nine months ended September 30, 2010 compared with a provision of \$54.9 million in the year-ago period.

Net income from continuing operations attributable to Unisys Corporation for the nine months ended September 30, 2010 was \$63.7 million, or \$1.47 per diluted share, compared with \$58.5 million, or \$1.51 per share, for the prior-year period.

Income from discontinued operations for the nine months ended September 30, 2010 was \$73.2 million, or \$1.69 per diluted share, compared with \$16.3 million, or \$.42 per share, for the nine months ended September 30, 2009. See note (a) of the Notes to Consolidated Financial Statements.

Due to cumulative inflation of approximately 100 percent or more over the last 3-year period, the company's Venezuelan subsidiary has applied highly inflationary accounting beginning January 1, 2010. For those international subsidiaries operating in highly inflationary economies, the U.S. dollar is the functional currency, and as such, nonmonetary assets and liabilities are translated at historical exchange rates, and monetary assets and liabilities are translated at current exchange rates. Exchange gains and losses arising from translation are included in other income (expense), net. Effective January 11, 2010, the Venezuelan government devalued the Bolivar Fuerte by 50 percent by resetting the official exchange rate from 2.15 to the U.S. dollar to 4.30 to the U.S. dollar. As a result, the company recorded a foreign exchange loss in the first quarter of 2010 of approximately \$20 million. The company has used and continues to use the official exchange rate for translation purposes. At September 30, 2010, the company's operations in Venezuela had net monetary assets denominated in local currency of approximately \$20 million.

Segment results

The company has two business segments: Services and Technology. Revenue classifications by segment are as follows: Services—systems integration and consulting, outsourcing, infrastructure services and core maintenance; Technology—enterprise-class servers and other technology.

The accounting policies of each business segment are the same as those followed by the company as a whole. Intersegment sales and transfers are priced as if the sales or transfers were to third parties. Accordingly, the Technology segment recognizes intersegment revenue and manufacturing profit on hardware and software shipments to customers under Services contracts. The Services segment, in turn, recognizes customer revenue and marketing profit on such shipments of company hardware and software to customers. The Services segment also includes the sale of hardware and software products sourced from third parties that are sold to customers through the company's Services channels. In the company's consolidated statements of income, the manufacturing costs of products sourced from the Technology segment and sold to Services customers are reported in cost of revenue for Services.

Also included in the Technology segment's sales and operating profit are sales of hardware and software sold to the Services segment for internal use in Services engagements. The amount of such profit included in operating income of the Technology segment for the three months ended September 30, 2010 and 2009 was \$4.9 million and \$1.5 million, respectively. The amount for the nine months ended September 30, 2010 and 2009 was \$5.4 million and \$12.0 million, respectively. The profit on these transactions is eliminated in Corporate.

The company evaluates business segment performance on operating income exclusive of restructuring charges and unusual and nonrecurring items, which are included in Corporate. All other corporate and centrally incurred costs are allocated to the business segments, based principally on revenue, employees, square footage or usage.

Three months ended September 30, 2010 compared with the three months ended September 30, 2009

Information by business segment is presented below (in millions of dollars):

	<u>Total</u>	<u>Elimi- nations</u>	<u>Services</u>	<u>Technology</u>
Three Months Ended September 30, 2010				
Customer revenue	\$ 960.6		\$855.2	\$ 105.4

Gross profit percent and operating income percent are as a percent of total revenue.

Customer revenue by classes of similar products or services, by segment, is presented below (in millions of dollars):

	<u>Three Months Ended September 30</u>		<u>Percent Change</u>
	<u>2010</u>	<u>2009</u>	
Services			
Systems integration and consulting	\$291.5	\$ 327.3	(10.9)%
Outsourcing	392.4	411.3	(4.6)%
Infrastructure services	116.4	133.7	(12.9)%
Core maintenance	54.9	80.5	(31.8)%
	<u>855.2</u>	<u>952.8</u>	<u>(10.2)%</u>
Technology			
Enterprise-class servers	77.0	138.8	(44.5)%
Other technology	28.4	14.8	91.9%
	<u>105.4</u>	<u>153.6</u>	<u>(31.4)%</u>
Total	<u>\$960.6</u>	<u>\$1,106.4</u>	<u>(13.2)%</u>

In the Services segment, customer revenue was \$855.2 million for the three months ended September 30, 2010 down 10.2% from the three months ended September 30, 2009. Approximately 2 percentage points of the decline were due to divestitures of businesses. Foreign currency translation had a 1-percentage-point negative impact on Services revenue in the current quarter compared with the year-ago period.

Revenue from systems integration and consulting decreased 10.9% from \$327.3 million in the September 2009 quarter to \$291.5 million in the September 2010 quarter, reflecting lower demand for project-based services.

Outsourcing revenue decreased 4.6% for the three months ended September 30, 2010 to \$392.4 million compared with the three months ended September 30, 2009, reflecting a decline in business processing outsourcing (BPO) revenue, offset in part by an increase in information technology outsourcing (ITO) revenue.

Infrastructure services revenue declined 12.9% for the three month period ended September 30, 2010 compared with the three month period ended September 30, 2009, reflecting the company's de-emphasis of lower-margin business, as well as the shift from project work to managed outsourcing contracts. Approximately 5 percentage points of the decline were due to divestitures of businesses.

Core maintenance revenue declined 31.8% in the current quarter compared with the prior-year quarter, reflecting the continuing secular decline of core maintenance. Approximately 12 percentage points of the decline were due to divestitures of businesses.

Services gross profit was 20.6% in the third quarter of 2010 compared with 19.9% in the year-ago period. Services operating income percent was 8.0% in the three months ended September 30, 2010 compared with 7.5% in the three months ended September 30, 2009.

In the Technology segment, customer revenue was \$105.4 million in the current quarter compared with \$153.6 million in the year-ago period for a decrease of 31.4%. Foreign currency translation had a negligible impact on Technology revenue in the current period compared with the prior-year period. The decrease in Technology revenue in 2010 was principally due to lower sales of the company's ClearPath products.

Revenue from the company's enterprise-class servers, which includes the company's ClearPath and ES7000 product families, decreased 44.5% for the three months ended September 30, 2010 compared with the three months ended September 30, 2009. The decrease was due to lower sales of the company's ClearPath products.

Revenue from other technology was \$28.4 million for the three months ended September 30, 2010 compared with \$14.8 million for the three months ended September 30, 2009.

Technology gross profit was 47.6% in the current quarter compared with 55.2% in the year-ago quarter. Technology operating income percent was 7.9% in the three months ended September 30, 2010 compared with 21.2% in the three months ended

September 30, 2009. The decreases in gross profit and operating profit margins in 2010 compared with 2009 principally reflect the decline in sales of high margin enterprise servers.

Nine months ended September 30, 2010 compared with the nine months ended September 30, 2009

Information by business segment is presented below (in millions of dollars):

	<u>Total</u>	<u>Elimi- nations</u>	<u>Services</u>	<u>Technology</u>
Nine Months Ended September 30, 2010				
Customer revenue	\$2,975.0		\$2,597.7	\$ 377.3
Intersegment	—	\$ (84.9)	3.6	81.3
Total revenue	<u>\$2,975.0</u>	<u>\$ (84.9)</u>	<u>\$2,601.3</u>	<u>\$ 458.6</u>
Gross profit percent	<u>25.6%</u>		<u>19.5%</u>	<u>54.5%</u>
Operating income percent	<u>8.1%</u>		<u>6.3%</u>	<u>17.4%</u>
Nine Months Ended September 30, 2009				
Customer revenue	\$3,227.1		\$2,858.7	\$ 368.4
Intersegment	—	\$ (118.5)	5.1	113.4
Total revenue	<u>\$3,227.1</u>	<u>\$ (118.5)</u>	<u>\$2,863.8</u>	<u>\$ 481.8</u>
Gross profit percent	<u>24.0%</u>		<u>19.2%</u>	<u>43.8%</u>
Operating income percent	<u>6.1%</u>		<u>5.8%</u>	<u>2.8%</u>

Gross profit percent and operating income percent are as a percent of total revenue.

Customer revenue by classes of similar products or services, by segment, is presented below (in millions of dollars):

	<u>Nine Months Ended September 30</u>		<u>Percent Change</u>
	<u>2010</u>	<u>2009</u>	
Services			
Systems integration and consulting	\$ 921.9	\$1,018.5	(9.5)%
Outsourcing	1,144.2	1,186.7	(3.6)%
Infrastructure services	357.1	419.7	(14.9)%
Core maintenance	174.5	233.8	(25.4)%
	<u>2,597.7</u>	<u>2,858.7</u>	<u>(9.1)%</u>
Technology			
Enterprise-class servers	311.0	295.5	5.2%
Other technology	66.3	72.9	(9.1)%
	<u>377.3</u>	<u>368.4</u>	<u>2.4%</u>
Total	<u>\$2,975.0</u>	<u>\$3,227.1</u>	<u>(7.8)%</u>

In the Services segment, customer revenue was \$2,597.7 million for the nine months ended September 30, 2010 down 9.1% from the nine months ended September 30, 2009. Approximately 2 percentage points of the decline were due to divestitures of businesses. Foreign currency translation had a 2-percentage-point positive impact on Services revenue in the first nine months of 2010 compared with the year-ago period.

Revenue from systems integration and consulting decreased 9.5% from \$1,018.5 million for the nine months ended September 30, 2009 to \$921.9 million for the nine months ended September 30, 2010, reflecting lower demand for project-based services from the company's U.S. federal business.

Outsourcing revenue decreased 3.6% for the nine months ended September 30, 2010, as a decline in business processing outsourcing (BPO) revenue was only partially offset by an increase in information technology outsourcing (ITO) revenue.

Infrastructure services revenue declined 14.9% for the nine months ended September 30, 2010, reflecting the company's de-emphasis of lower-margin business, as well as the shift from project work to managed outsourcing contracts. Approximately 4 percentage points of the decline were due to divestitures of businesses.

Core maintenance revenue declined 25.4% in the nine months ended September 30, 2010 compared with the prior-year period, reflecting the continuing secular decline of core maintenance. Approximately 12 percentage points of the decline were due to divestitures of businesses.

Services gross profit was 19.5% for the nine months ended September 30, 2010 compared with 19.2% in the year-ago period. Services operating income percent was 6.3% for the nine months ended September 30, 2010 compared with 5.8% for the nine months ended September 30, 2009.

In the Technology segment, customer revenue was \$377.3 million in the nine months ended September 30, 2010 compared with \$368.4 million in the year-ago period for an increase of 2.4% (adjusting for divested businesses, the increase would have been 5 percentage points higher). Foreign currency translation had a positive impact of approximately 2-percentage points on Technology revenue in the first nine months of 2010 compared with the prior-year period. The increase in Technology revenue in the first nine months of 2010 was principally due to higher sales in the United States, Europe, Latin America and Brazil.

Revenue from the company's enterprise-class servers, which includes the company's ClearPath and ES7000 product families, increased 5.2% for the nine months ended September 30, 2010 compared with the nine months ended September 30, 2009. The increase was due to higher sales of the company's ClearPath products.

Revenue from other technology decreased 9.1% for the nine months ended September 30, 2010 compared with the nine months ended September 30, 2009, principally due to lower sales of third-party technology products as well as the divestiture of a business. Approximately 16 percentage points of the decline were due to divestitures of businesses.

Technology gross profit was 54.5% in the first nine months of 2010 compared with 43.8% in the year-ago period. Technology operating income percent was 17.4% for the nine months ended September 30, 2010 compared with 2.8% for the nine months ended September 30, 2009. The increases in gross profit and operating profit margins in 2010 compared with 2009 principally reflect a richer mix of high margin enterprise servers.

New accounting pronouncements

See note (j) of the Notes to Consolidated Financial Statements for a full description of recent accounting pronouncements, including the expected dates of adoption and estimated effects on results of operations and financial condition.

Financial condition

The company's principal sources of liquidity are cash on hand, cash from operations and its \$150 million U.S. accounts receivable securitization facility, which is discussed below. The company believes that it will have adequate sources of liquidity to meet its expected near-term cash requirements.

Cash and cash equivalents at September 30, 2010 were \$688.7 million compared with \$647.6 million at December 31, 2009. At December 31, 2009, the company had sold \$100 million of receivables under its U.S. accounts receivable securitization facility compared with zero as of September 30, 2010.

During the nine months ended September 30, 2010, cash provided by operations was \$150.0 million compared with cash provided of \$181.8 million for the nine months ended September 30, 2009. The principal reason for the decline in cash provided from operations was the \$100 million decrease in the utilization in the company's U.S. accounts receivable securitization facility, discussed above. In addition, cash expenditures in the current nine-month period related to cost-reduction actions (which are included in operating activities) were approximately \$18.1 million compared with \$56.2 million for the prior-year period. Cash expenditures for prior year cost-reduction actions are expected to be approximately \$3.6 million for the remainder of 2010, resulting in an

expected cash expenditure of approximately \$21.7 million in 2010 compared with \$61.3 million in 2009.

Cash used for investing activities for the nine months ended September 30, 2010 was \$25.8 million compared with cash usage of \$231.7 million during the nine months ended September 30, 2009. The current nine-month period includes net proceeds of \$121.2 million related to the sale of the company's HIM business, as well as the sale of the company's U.S. specialized technology check sorter and related U.S. maintenance business and its UISL business (see note (a) of the Notes to Consolidated Financial Statements). Items affecting cash used for investing activities were the following: Net proceeds of investments were \$1.0 million for the nine months ended September 30, 2010 compared with net proceeds of \$1.9 million in the prior-year period. Proceeds from investments and purchases of investments represent derivative financial instruments used to reduce the company's currency exposure to market risks from changes in foreign currency exchange rates. During the nine months ended September 30, 2010, cash provided of \$13.9 million related to the net change in restricted deposits compared with a cash usage of \$82.5 million in the prior year period. In addition, in the current year period, the investment in marketable software was \$41.8 million compared with \$43.7 million in the year-ago period, capital additions of properties were \$49.7 million in 2010 compared with \$32.1 million in 2009 and capital additions of outsourcing assets were \$70.4 million in 2010 compared with \$73.4 million in 2009. The increase in capital additions of properties was principally due to expenditures related to new facilities as part of the company's multi-year plan to reduce its leased square footage.

Cash used for financing activities during the nine months ended September 30, 2010 was \$76.8 million compared with cash used of \$45.4 million during the nine months ended September 30, 2009. The current-year period includes \$78.0 million used to redeem and to extinguish long-term debt, compared with \$30.0 million in the year-ago period.

At September 30, 2010, total debt was \$837.5 million, a decrease of \$74.2 million from December 31, 2009, principally due to the redemption at maturity of the remainder of the company's 6 7/8% senior notes.

The company and certain international subsidiaries have access to uncommitted lines of credit from various banks.

On May 16, 2008, the company entered into a three-year, U.S. accounts receivable securitization facility. Under this facility, the company has agreed to sell, on an ongoing basis, through Unisys Funding Corporation I, a wholly owned subsidiary, up to \$150 million of interests in eligible U.S. trade accounts receivable. Under the facility, receivables are sold at a discount that reflects, among other things, a yield based on LIBOR subject to a minimum rate. The facility includes customary representations and warranties, including no material adverse change in the company's business, assets, liabilities, operations or financial condition. It also requires the company to maintain a minimum fixed charge coverage ratio and requires the maintenance of certain ratios related to the sold receivables. Termination events include failure to perform covenants, materially incorrect representations and warranties, change of control and default under debt aggregating at least \$25 million. At September 30, 2010 and December 31, 2009, the company had sold zero and \$100 million, respectively, of eligible receivables. As discussed in note (j) of the Notes to Consolidated Financial Statements, effective January 1, 2010, the company concluded that sales of participating interest in accounts receivable under its U.S. trade accounts receivable facility no longer meet the requirements to be accounted for as sales due to the change in the definition of a participating interest, whereby all cash flows received from the entire financial asset must be divided proportionally among the participating interest holders in an amount equal to their share of ownership. Since in the company's U.S. trade accounts receivable facility, the company's retained interest is subordinated to the other holders, the transaction does not meet the definition of the sale of a participating interest, and therefore will be accounted for as a secured borrowing. See note (m) of the Notes to Consolidated Financial Statements.

At September 30, 2010, the company has met all covenants and conditions under its various lending and funding agreements. The company expects to continue to meet these covenants and conditions.

The company currently expects to make cash contributions of approximately \$115 million to its worldwide, primarily non-U.S., defined benefit pension plans in 2010. In accordance with regulations governing contributions to U.S. defined benefit pension plans, the company is not required to make cash contributions to its U.S. qualified defined benefit pension plan in 2010. Under an amendment to the Pension Protection Act (PPA) enacted on June 25, 2010, the company expects that no cash contribution to its U.S. qualified defined benefit pension plan

will be required in 2011. Previously, the company expected that it would be required to make a cash contribution of up to approximately \$30 million in 2011.

Pursuant to the indentures governing the company's secured notes maturing in 2014 and 2015, net proceeds from the sale of the HIM business are restricted and may be used only for certain purposes, including to purchase long-term assets that would constitute collateral; to make capital expenditures with respect to assets that constitute collateral; to repay certain of the company's outstanding debt obligations; or to acquire other assets that are used or useful in its business and that would constitute collateral. At September 30, 2010, \$10.9 million remained restricted. This amount is reported in prepaid expenses and other current assets in the company's consolidated balance sheet. See note (a) of the Notes to Consolidated Financial Statements.

The company may, from time to time, redeem, tender for, or repurchase its securities in the open market or in privately negotiated transactions depending upon availability, market conditions and other factors. The company has on file with the Securities and Exchange Commission an effective registration statement covering \$1.1 billion of debt or equity securities, which enables the company to be prepared for future market opportunities.

Factors that may affect future results

From time to time, the company provides information containing "forward-looking" statements, as defined in the Private Securities Litigation Reform Act of 1995. Forward-looking statements provide current expectations of future events and include any statement that does not directly relate to any historical or current fact. Words such as "anticipates," "believes," "expects," "intends," "plans," "projects" and similar expressions may identify such forward-looking statements. All forward-looking statements rely on assumptions and are subject to risks, uncertainties and other factors that could cause the company's actual results to differ materially from expectations. Factors that could affect future results include, but are not limited to, those discussed below. Any forward-looking statement speaks only as of the date on which that statement is made. The company assumes no obligation to update any forward-looking statement to reflect events or circumstances that occur after the date on which the statement is made.

Factors that could affect future results include the following:

The company's business has been adversely affected by global economic conditions and could be further adversely affected if economic conditions worsen or if there are acts of war, terrorism or natural disasters. The company's recent financial results have been impacted by the global economic slowdown. The company has seen this slowdown particularly in its financial services business but also in other key commercial industries, as clients reacted to economic uncertainties by reducing information technology spending. Decreased demand for the company's services and products has impacted its revenue and profit margins. If economic conditions worsen, the company could see reductions in demand and increased pressure on revenue and profit margins. The company could also see a further consolidation of clients, which could also result in a decrease in demand. The company's business could also be affected by acts of war, terrorism or natural disasters. Current world tensions could escalate, and this could have unpredictable consequences on the world economy and on the company's business.

The company has significant pension obligations and may be required to make significant cash contributions to its defined benefit pension plans. The company has unfunded obligations under its U.S. and non-U.S. defined benefit pension plans. The company expects to make cash contributions of approximately \$115 million to its worldwide, primarily non-U.S., defined benefit pension plans in 2010. In accordance with regulations governing contributions to U.S. defined benefit pension plans, the company is not required to fund its U.S. qualified defined benefit pension plan in 2010. Under an amendment to the Pension Protection Act (PPA) enacted on June 25, 2010, the company expects that no cash contribution to its U.S. qualified defined benefit pension plan will be required in 2011. Previously, the company expected that it would be required to make a cash contribution of up to approximately \$30 million in 2011.

Deterioration in the value of the company's worldwide defined benefit pension plan assets could require the company to make larger cash contributions to its defined benefit pension plans in the future. In addition, the funding of plan deficits over a shorter period of time than currently anticipated could result in making cash contributions to these plans on a more accelerated basis. Either of these events would reduce the cash available for working capital and other

corporate uses and may have an adverse impact on the company's operations, financial condition and liquidity.

The company's future results will depend on the success of its program to reduce costs, focus its global resources and simplify its business structure. Over the past several years, the company has implemented and is continuing to implement, significant cost-reduction measures intended to improve profitability. In prior years, the company has incurred significant cost reduction charges in connection with these efforts. Future results will depend on the success of these efforts as well as on the success of the company's program to focus its global resources and simplify its business structure. This program is based on various assumptions, including assumptions regarding market segment growth, client demand, and the proper skill set of and training for sales and marketing management and personnel, all of which are subject to change. Furthermore, the company's institutional stockholders may attempt to influence these strategies.

The company faces aggressive competition in the information services and technology marketplace, which could lead to reduced demand for the company's products and services and could have an adverse effect on the company's business. The information services and technology markets in which the company operates include a large number of companies vying for customers and market share both domestically and internationally. The company's competitors include consulting and other professional services firms, systems integrators, outsourcing providers, infrastructure services providers, computer hardware manufacturers and software providers. Some of the company's competitors may develop competing products and services that offer better price-performance or that reach the market in advance of the company's offerings. Some competitors also have or may develop greater financial and other resources than the company, with enhanced ability to compete for market share, in some instances through significant economic incentives to secure contracts. Some also may be better able to compete for skilled professionals. Any of these factors could lead to reduced demand for the company's products and services and could have an adverse effect on the company's business. Future results will depend on the company's ability to mitigate the effects of aggressive competition on revenues, pricing and margins and on the company's ability to attract and retain talented people.

The company's future results will depend upon its ability to effectively anticipate and respond to volatility and rapid technological change in its industry. The company operates in a highly volatile industry characterized by rapid technological change, evolving technology standards, short product life cycles and continually changing customer demand patterns. Future success will depend in part on the company's ability to anticipate and respond to these market trends and to design, develop, introduce, deliver or obtain new and innovative products and services on a timely and cost-effective basis. The company may not be successful in anticipating or responding to changes in technology, industry standards or customer preferences, and the market may not demand or accept its services and product offerings. In addition, products and services developed by competitors may make the company's offerings less competitive.

The company's future results will depend on its ability to retain significant clients. The company has a number of significant long-term contracts with clients, including governmental entities, and its future success will depend, in part, on retaining its relationships with these clients. The company could lose clients for such reasons as contract expiration, conversion to a competing service provider, disputes with clients or a decision to in-source services, including for contracts with governmental entities as part of the rebid process. The company could also lose clients as a result of their merger, acquisition or business failure. The company may not be able to replace the revenue and earnings from any such lost client.

The company's future results will depend in part on its ability to take on, successfully implement and grow outsourcing operations. The company's outsourcing contracts are multiyear engagements under which the company takes over management of a client's technology operations, business processes or networks. In a number of these arrangements, the company hires certain of its clients' employees and may become responsible for the related employee obligations, such as pension and severance commitments. In addition, system development activity on outsourcing contracts may require the company to make significant upfront investments. The company will need to have available sufficient financial resources in order to take on these obligations and make these investments.

Recoverability of outsourcing assets is dependent on various factors, including the timely completion and ultimate cost of the outsourcing solution, and realization of expected profitability of existing outsourcing contracts. These risks could result in an impairment of a portion of the associated assets, which are tested for recoverability quarterly.

As long-term relationships, outsourcing contracts provide a base of recurring revenue. However, outsourcing contracts are highly complex and can involve the design, development, implementation and operation of new solutions and the transitioning of clients from their existing business processes to the new environment. In the early phases of these contracts, gross margins may be lower than in later years when an integrated solution has been implemented, the duplicate costs of transitioning from the old to the new system have been eliminated and the work force and facilities have been rationalized for efficient operations. Future results will depend on the company's ability to effectively and timely complete these implementations, transitions and rationalizations.

Future results will also depend in part on the company's ability to drive profitable growth in consulting and systems integration. The company's ability to grow profitably in this business will depend on the level of demand for systems integration projects and the portfolio of solutions the company offers for specific industries. It will also depend on an improvement in the utilization of services delivery personnel. In addition, profit margins in this business are largely a function of the rates the company is able to charge for services and the chargeability of its professionals. If the company is unable to attain sufficient rates and chargeability for its professionals, profit margins will suffer. The rates the company is able to charge for services are affected by a number of factors, including clients' perception of the company's ability to add value through its services; introduction of new services or products by the company or its competitors; pricing policies of competitors; and general economic conditions. Chargeability is also affected by a number of factors, including the company's ability to transition employees from completed projects to new engagements, and its ability to forecast demand for services and thereby maintain an appropriate headcount.

Future results will also depend, in part, on market demand for the company's high-end enterprise servers and maintenance on these servers. In recent years, the company's high-end enterprise servers and maintenance on these servers have experienced revenue declines. The company continues to apply its resources to develop value-added software capabilities and optimized solutions for these server platforms which provide competitive differentiation. Future results will depend, in part, on customer acceptance of ClearPath systems and the company's ability to maintain its installed base for ClearPath and to develop next-generation ClearPath products that are purchased by the installed base.

The company's contracts with U.S. governmental agencies may subject the company to audits, criminal penalties, sanctions and other expenses and fines. The company frequently enters into contracts with governmental entities. U.S. government agencies, including the Defense Contract Audit Agency and the Department of Labor, routinely audit government contractors. These agencies review a contractor's performance under its contracts, cost structure and compliance with applicable laws, regulations and standards. The U.S. government also may review the adequacy of, and a contractor's compliance with contract terms and conditions, its systems and policies, including the contractor's purchasing, property, estimating, billing, accounting, compensation and management information systems. Any costs found to be overcharged or improperly allocated to a specific contract or any amounts improperly billed or charged for products or services will be subject to reimbursement to the government. In addition, government contractors, such as the company, are required to disclose credible evidence of certain violations of law and contract overpayments to the federal government. If the company is found to have participated in improper or illegal activities, the company may be subject to civil and criminal penalties and administrative sanctions, including termination of contracts, forfeiture of profits, suspension of payments, fines and suspension or prohibition from doing business with the U.S. government. Any negative publicity related to such contracts, regardless of the accuracy of such publicity, may adversely affect our business or reputation.

The company's contracts may not be as profitable as expected or provide the expected level of revenues. In a number of the company's long-term contracts for infrastructure services, outsourcing, help desk and similar services, the company's revenue is based on the volume of products and services provided. As a result, revenue levels anticipated at the contract's inception are not guaranteed. In addition, some of these contracts may permit termination at the

customer's discretion before the end of the contract's term or may permit termination or impose other penalties if the company does not meet the performance levels specified in the contracts.

The company's contracts with governmental entities are subject to the availability of appropriated funds. These contracts also contain provisions allowing the governmental entity to terminate the contract at the governmental entity's discretion before the end of the contract's term. In addition, if the company's performance is unacceptable to the customer under a government contract, the government retains the right to pursue remedies under the affected contract, which remedies could include termination.

Certain of the company's outsourcing agreements require that the company's prices be benchmarked if the customer requests it and provide that those prices may be adjusted downward if the pricing for similar services in the market has changed. As a result, revenues anticipated at the beginning of the terms of these contracts may decline in the future.

Some of the company's systems integration contracts are fixed-price contracts under which the company assumes the risk for delivery of the contracted services and products at an agreed-upon fixed price. At times the company has experienced problems in performing some of these fixed-price contracts on a profitable basis and has provided periodically for adjustments to the estimated cost to complete them. Future results will depend on the company's ability to perform these services contracts profitably.

The company may face damage to its reputation or legal liability if its clients are not satisfied with its services or products. The success of the company's business is dependent on strong, long-term client relationships and on its reputation for responsiveness and quality. As a result, if a client is not satisfied with the company's services or products, its reputation could be damaged and its business adversely affected. Allegations by private litigants or regulators of improper conduct, as well as negative publicity and press speculation about the company, whatever the outcome and whether or not valid, may harm its reputation. In addition to harm to reputation, if the company fails to meet its contractual obligations, it could be subject to legal liability, which could adversely affect its business, operating results and financial condition.

Future results will depend in part on the performance and capabilities of third parties with whom the company has commercial relationships. The company has commercial relationships with suppliers, channel partners and other parties that have complementary products, services or skills. Future results will depend, in part, on the performance and capabilities of these third parties, on the ability of external suppliers to deliver components at reasonable prices and in a timely manner, and on the financial condition of, and the company's relationship with, distributors and other indirect channel partners.

More than half of the company's revenue is derived from operations outside of the United States, and the company is subject to the risks of doing business internationally. More than half of the company's total revenue is derived from international operations. The risks of doing business internationally include foreign currency exchange rate fluctuations, currency restrictions and devaluations, changes in political or economic conditions, trade protection measures, import or export licensing requirements, multiple and possibly overlapping and conflicting tax laws, new tax legislation, weaker intellectual property protections in some jurisdictions and additional legal and regulatory compliance requirements applicable to businesses that operate internationally, including the Foreign Corrupt Practices Act and non-U.S. laws and regulations.

Financial market conditions may inhibit the company's ability to access capital and credit markets to address its liquidity needs. The capital and credit markets have experienced volatility and disruption. Financial market conditions may impact the company's ability to borrow, to refinance its outstanding debt, or to utilize surety bonds, letters of credit, foreign exchange derivatives and other financial instruments the company uses to conduct its business. Although the company intends to use cash on hand to address its liquidity needs, its ability to do so assumes that its operations will continue to generate sufficient cash.

The company could face business and financial risk in implementing future dispositions or acquisitions. As part of the company's business strategy, it may from time to time consider disposing of existing technologies, products and

businesses that may no longer be in alignment with its strategic direction, including transactions of a material size, or acquiring complementary technologies, products and businesses. Potential risks with respect to dispositions include difficulty finding buyers or alternative exit strategies on acceptable terms in a timely manner; potential loss of employees; and dispositions at unfavorable prices or on unfavorable terms, including relating to retained liabilities. Any acquisitions may result in the incurrence of substantial additional indebtedness or contingent liabilities. Acquisitions could also result in potentially dilutive issuances of equity securities and an increase in amortization expenses related to intangible assets. Additional potential risks associated with acquisitions include integration difficulties; difficulties in maintaining or enhancing the profitability of any acquired business; risks of entering markets in which the company has no or limited prior experience; potential loss of employees or failure to maintain or renew any contracts of any acquired business; and expenses of any undiscovered or potential liabilities of the acquired product or business, including relating to employee benefits contribution obligations or environmental requirements. Further, with respect to both dispositions and acquisitions, management's attention could be diverted from other business concerns. Adverse credit conditions could also affect the company's ability to consummate divestments or acquisitions. The risks associated with dispositions and acquisitions could have a material adverse effect upon the company's business, financial condition and results of operations. There can be no assurance that the company will be successful in consummating future dispositions or acquisitions on favorable terms or at all.

The company's services or products may infringe upon the intellectual property rights of others. The company cannot be sure that its services and products do not infringe on the intellectual property rights of third parties, and it may have infringement claims asserted against it or against its clients. These claims could cost the company money, prevent it from offering some services or products, or damage its reputation.

Pending litigation could affect the company's results of operations or cash flow. There are various lawsuits, claims, investigations and proceedings that have been brought or asserted against the company, which arise in the ordinary course of business, including actions with respect to commercial and government contracts, labor and employment, employee benefits, environmental matters and intellectual property. See note (k) of the Notes to Consolidated Financial Statements for more information on litigation. The company believes that it has valid defenses with respect to legal matters pending against it. Litigation is inherently unpredictable, however, and it is possible that the company's results of operations or cash flow could be affected in any particular period by the resolution of one or more of the legal matters pending against it.

Changes in ownership of the company's common stock could limit its ability to utilize net operating losses and tax credit carryforwards. Internal Revenue Code Sections 382 and 383 provide annual limitations with respect to the ability of a corporation to utilize its net operating loss (as well as certain built-in losses) and tax credit carryforwards, respectively (Tax Attributes), against future U.S. taxable income, if the corporation experiences an "ownership change." In general terms, an ownership change may result from transactions increasing the ownership of certain stockholders in the stock of a corporation by more than 50 percentage points over a three-year period.

The company regularly monitors ownership changes (as calculated for purposes of Section 382). Based on currently available information, the company's "ownership change" level is estimated to be in excess of 45 percentage points as of September 30, 2010.

In the event of an ownership change, utilization of the company's Tax Attributes would be subject to an annual limitation determined in part by multiplying the value of our stock at the time of the ownership change by the applicable long-term tax-exempt rate (which is 3.98% for October 2010), possibly subject to increase based on the built-in gain in the company's assets at the time of the ownership change. Any unused annual limitation may be carried over to later years. In the event of an ownership change, the company's future U.S. taxable income may not be fully offset by existing Tax Attributes, if such income exceeds the company's annual limitation, and the company may incur a tax liability with respect to such income.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

There has been no material change in the company's assessment of its sensitivity to market risk since its disclosure in its Annual Report on Form 10-K for the fiscal year ended December 31, 2009.

Item 4. Controls and Procedures

The company's management, with the participation of the company's Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the company's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) as of the end of the period covered by this report. Based on this evaluation, the company's Chief Executive Officer and Chief Financial Officer concluded that, as of the end of such period, our disclosure controls and procedures are effective. Such evaluation did not identify any change in the company's internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that occurred during the fiscal quarter to which this report relates that has materially affected, or is reasonably likely to materially affect, the company's internal control over financial reporting.

Part II—OTHER INFORMATION**Item 1. Legal Proceedings**

Information with respect to litigation is set forth in note (k) of the Notes to Consolidated Financial Statements, and such information is incorporated herein by reference.

Item 1A. Risk Factors

See "Factors that may affect future results" in Management's Discussion and Analysis of Financial Condition and Results of Operations for a discussion of risk factors.

Item 6. Exhibits

(a) Exhibits

UNISYS CORPORATION
COMPUTATION OF RATIO OF EARNINGS TO FIXED CHARGES (UNAUDITED)
(\$ in millions)

	Nine Months Ended Sept. 30, 2010	Years Ended December 31				
		2009	2008	2007	2006	2005
Fixed charges						
Interest expense	\$ 76.8	\$ 95.2	\$ 85.1	\$ 76.3	\$ 77.2	\$ 64.7
Interest capitalized during the period	6.8	7.5	9.0	9.1	9.9	15.0
Amortization of debt issuance expenses	2.0	3.3	4.1	3.8	3.8	3.4
Portion of rental expense representative of interest	26.2	34.9	46.9	52.4	53.7	58.0
Total Fixed Charges	<u>111.8</u>	<u>140.9</u>	<u>145.1</u>	<u>141.6</u>	<u>144.6</u>	<u>141.1</u>
Earnings						
Income (loss) from continuing operations before income taxes	119.7	218.2	(97.6)	14.8	(228.9)	(154.8)
Add (deduct) the following:						
Share of loss (income) of associated companies	—	—	—	—	4.5	(7.2)
Amortization of capitalized interest	6.9	11.6	16.1	14.5	13.7	12.9
Subtotal	<u>126.6</u>	<u>229.8</u>	<u>(81.5)</u>	<u>29.3</u>	<u>(210.7)</u>	<u>(149.1)</u>
Fixed charges per above	111.8	140.9	145.1	141.6	144.6	141.1
Less interest capitalized during the period	(6.8)	(7.5)	(9.0)	(9.1)	(9.9)	(15.0)
Total earnings (loss)	<u>\$231.6</u>	<u>\$363.2</u>	<u>\$ 54.6</u>	<u>\$161.8</u>	<u>\$ (76.0)</u>	<u>\$ (23.0)</u>
Ratio of earnings to fixed charges	<u>2.07</u>	<u>2.58</u>	<u>*</u>	<u>1.14</u>	<u>*</u>	<u>*</u>

* Earnings for the years ended December 31, 2008, 2006 and 2005 were inadequate to cover fixed charges by \$90.5 million, \$220.6 million and \$164.1 million, respectively.

CERTIFICATION

I, J. Edward Coleman, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Unisys Corporation;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

CERTIFICATION OF PERIODIC REPORT

I, J. Edward Coleman, Chairman of the Board and Chief Executive Officer of Unisys Corporation (the "Company"), certify, pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, 18 U.S.C. Section 1350, that:

- (1) the Quarterly Report on Form 10-Q of the Company for the quarterly period ended September 30, 2010 (the "Report") fully complies with the requirements of Section 13(a) of the Securities Exchange Act of 1934 (15 U.S.C. 78m); and
- (2) the information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.

Dated: October 28, 2010

/s/ J. Edward Coleman

J. Edward Coleman
Chairman of the Board and
Chief Executive Officer

A signed original of this written statement required by Section 906 has been provided to the Company and will be retained by the Company and furnished to the Securities and Exchange Commission or its staff upon request.

CERTIFICATION OF PERIODIC REPORT

I, Janet Brutschea Haugen, Senior Vice President and Chief Financial Officer of Unisys Corporation (the "Company"), certify, pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, 18 U.S.C. Section 1350, that:

(1) the Quarterly Report on Form 10-Q of the Company for the quarterly period ended September 30, 2010 (the "Report") fully complies with the requirements of Section 13(a) of the Securities Exchange Act of 1934 (15 U.S.C. 78m); and

(2) the information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.

Dated: October 28, 2010
